Electricity in Fish Research and Management W. R. C. Beaumont,2016-04-18

Electricity in Fish Research and Management 2nd Edition provides a comprehensive discussion of the uses of both electricity and electrical principles in fishery management and research. It covers electric fishing including theory, equipment, data analysis and practical factors affecting efficiency, fish barriers, fish counters and fish welfare issues. The book concentrates on Electric Fishing or Electrofishing, an internationally accepted and widely used procedure for sampling fish. Over the past 50 years, electric fishing has become a standard method for fishery studies and management, e.g. establishing population densities and abundance. However, due to the potential hazards of the method both to operators and fish, there is a continuing need to develop and promote best practice guidelines. The author has studied fish ecology for 40 years and understands the need for information that reaches out to all levels of understanding in the field. Previous books on this subject have either been collections of scientific papers and/or technical reports or very simple instruction manuals. In this book, theory and practice is explained using non-technical language and simple equations. It brings depth as well as breadth in both information and principles behind the methods and should be an invaluable tool to both fisheries managers and researchers. Although the book is aimed at undergraduates, the clear explanation of the factors means that the book is suitable for all levels of practitioners.

Poetry for historians Carolyn Steedman, 2018-04-13 This is a book about the conflict between history and poetry and historians and poets in Atlantic World society from the end of the seventeenth century to the present day. Blending historiography and theory, it proceeds by asking what is the point of poetry as far as historians are concerned. The focus is on W. H. Auden's Cold War era history poems, but the book also looks at other poets from the seventeenth century onwards, providing original accounts of their poetic and historical educations. An important resource for those teaching undergraduate and postgraduate courses in historiography and history and theory. Poetry for historians will also be of relevance to courses on literature in society and the history of education. General readers will relate it to Steedman's *Landscape for a Good Woman* (1987) and *Dust* (2001) on account of its biographical and autobiographical insights into the way history operates in modern society.

Retrofitting for Optimal Energy Performance Tantau, Adrian, 2019-06-14 Retrofitting expresses in a traditional approach the process of improving something after it has been manufactured, constructed or assembled. These systems integrate new technologies, new functions and new services that increase the energy performance in existing private, public and commercial buildings. Retrofitting for Optimal Energy Performance is a comprehensive reference source that examines environmentally conscious technologies and their applications in advancing retrofitting practices. Providing relevant theoretical frameworks and the latest empirical research findings in the area, it highlights an array of topics such as climate change, energy management and optimization modeling and is essential for academicians, students, researchers, engineers, architects, entrepreneurs, managers, policymakers and building owners.
