Junior Graphic Mavis Kitcher (Mrs),2014-06-18 **The Economy of Ghana Sixty Years after Independence** Ernest Aryeetey,Ravi Kanbur,2017-02-09 As Ghana approaches its 60th birthday optimism and worries for the future continue to be present in equal measure Economic growth in the last decade has been high by historical standards Indeed recent rebasing of GDP figures has put Ghana over the per capita income threshold into Middle Income Country status However structural transformation has lagged behind Fiscal discipline has also eroded significantly and there is heavy borrowing especially on the commercial market while elements of the natural resource curse from oil have already occurred The question most observers ask is whether the gains from two decades of reforms are being reversed Given this background this volume brings together leading established and young economists from within and outside Ghana to analyze and assess the challenges facing Ghana s economy as it enters its seventh decade and the nation heads towards three quarters of a century of independence The chapters cover the major macroeconomic and sectoral issues including fiscal and monetary policy trade and industrialization agriculture and infrastructure The volume also covers a full range of social issues including poverty and inequality education health gender and social protection The book also examines the implications of the oil boom for Ghanaian development and the role of institutions **Socioculturally Responsive Assessment** Randy E. Bennett,Linda Darling-Hammond,Aneesha Badrinarayan,2025-05-01 Socioculturally Responsive Assessment assembles the best available thinking from within and outside the educational measurement community about the theoretical foundations and systems level policy implications of formal assessment programs designed to be socioculturally responsive Synthesized from culturally responsive assessment design and practices culturally relevant pedagogy and funds of knowledge universal design for learning the learning sciences and other literatures this emerging concept affirms that students learning and performance is inextricably tied to the social cultural and linguistic contexts in which they live and develop knowledge Across four sections this book provides an argument and initial evidence for impact on students users and assessment quality offers guidance for implementation and examines the potential limitations pitfalls barriers and measurement issues that such programs will inevitably raise Scholars teaching faculty test developers and policymakers will come away with integral foundations new assessment approaches and a greater sense of the potential for positive impact that these assessments may afford Daily Graphic Ransford Tetteh,2014-04-12 **Modern Mathematics** Dirk De Bock,2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor

Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends

Odyssey of a Bombardier John J. Hurt, Steven E. Sidebotham, 2014-09-26
Odyssey of a Bombardier is the illustrated Prisoner of War log that depicts the experiences of bombardier Richard M Mason in German prison camps after his B 17 Flying Fortress was shot down by the Germans in France in 1944 the final year of World War II The log follows Mason from the day his plane crashed until his liberation in April 1945 and his return home to the United States Included are such topics as medical treatment and rehabilitation for wounded prisoners of the Germans life in Stalag Luft III a difficult long march in an arctic winter to another camp the travails of prisoners in the overcrowded filthy camp at Moosburg critical food shortages and the arrival of General George Patton with the liberating forces Mason was an amateur artist and illustrated his journal with moving depictions of prison life and comradeship This book shows U S airmen demonstrating grace and courage under pressure and meeting every challenge that their imprisonment presented

Agricultural and Food Controversies F. Bailey Norwood, Pascal A. Oltenacu, Michelle S. Calvo-Lorenzo, Sarah Lancaster, 2014-11-05 The world is more interested in issues surrounding agricultural and food issues than ever before Are pesticides safe Should we choose locally grown food Why do some people embrace new agricultural technologies while others steadfastly defend traditional farming methods In the debates about organic food genetically modified organisms and farm animal welfare it s not always clear what the scientific studies are actually telling us To understand these controversies and more the authors of Agricultural and Food Controversies What Everyone Needs to Know begin by encouraging readers to develop an understanding of how two well educated people can form radically different opinions about food Sometimes the disputes are scientific in nature and sometimes they arise from conflicting ethical views This book confronts the most controversial issues in agriculture by first explaining the principles of each side of the debate guiding readers through the scientific literature so that they can form their own educated opinions Questions asked Are organic foods truly better for your health Are chemical fertilizers sustainable or are we producing cheap food at the expense of future generations What foods should we eat to have a smaller carbon footprint Does buying local food stimulate the local economy Why are so many farm animals raised indoors Should antibiotics be given to livestock Is genetically modified food the key to global food security and does it give corporations too much market power Is the prevalence of corn throughout the food system the result of farm subsidies Providing a combination of research and popular opinions on both sides of the issue Agricultural and Food

Controversies What Everyone Needs to Know allows readers to decide for themselves what they personally value and believe to be important when it comes to their food **Tourism, Change and the Global South** Jarkko Saarinen, Jayne M. Rogerson, 2021-06-16 This significant volume is the first to focus on both the changing nature of tourism and the capacity of tourism to effect change especially in the Global South Geographically this changing nature of tourism is based on the transforming relationships between demand supply and location While this is nothing new in tourism recent decades have intensified the changing characteristics of global tourism From another perspective tourism represents a change and nowadays many localities and regions aim to use tourism as a tool for positive change i e development However this has turned out to be a challenging task in practice especially in the Global South context where the relationship between tourism growth and local development has often been controversial This book looks at a host of critical concepts in one volume such as growth and development adaptation and resilience sustainability and responsibility governance and planning and heritage and destination management strategies By understanding the drivers of change this book sheds new insight into the promise and role of sustainability and responsibility in tourism development This book will be of great interest to all upper level students academics and researchers in the fields of Tourism Geography and Cultural and Heritage studies
