

Chapter 2- exercises

1. Wined is a viticultural who produces wine from grapes grown on his own property. Which of Wined's assets is subject to IAS 41?
 - a. Theo 4,000 tons of grapes in the holding bay waiting to be processed into wine.
 - b. The 400 hectares of land that was acquired by Wined's great-grand-father.
 - c. The 3,500,000 bottles of wine stored in a refrigerated warehouse holding the produce last year's yield.
 - d. **The 300,000 grape vines that have been producing grapes for 4 generations of Wined's family.**
2. Masan owned cattle recorded in the financial statements at \$5,250 on 1 January 20X4. At 31 December 20X4 the cattle have a fair value of \$6,500. If Masan sold the cattle, commission of 2% would be payable. What is the correct accounting treatment for the cattle at 31 December 20X4 according to IAS 41 Agriculture?
 - a. Hold at cost of \$5,250.
 - b. Revalue to \$6,500, taking gain of \$1,250 to the statement of profit or loss.
 - c. Revalue to \$6,500, taking gain of \$1,250 to the revaluation surplus.
 - d. **Revalue to \$6,370, taking gain of \$1,120 to the statement of profit or loss.**
$$6500 \times 0.98 = 6370$$

Fair Value – cost of sales, taking gain or loss to the statement of PnL

3. The following is an extract from the 2013 Annual Report of SIPEF NV:
Because of the inherent uncertainty associated with the valuation at fair value of the biological assets due to the volatility of the prices of the agricultural produce and the absence of a liquid market, their carrying value may differ from their realisable value. Given the inherent uncertainty in applying IAS 41, discuss whether the pre-IAS 41 practice of value at historical cost is preferable for the statement of financial position.
4. Agriculture is a key business activity in many parts of the world, particularly in developing countries. Following extensive discussions with, and funding from, the World Bank, the International Accounting Standards Committee (IASC) developed an accounting standard relating to agricultural activity. IAS 41 Agriculture was published in 2001 to apply to accounting periods beginning on or after 1 January 2003. Sigma prepares financial statements to 30 September each year. On 1 October 2003 Sigma carried out the following transactions:
 - Purchased a large piece of land for \$20 million.
 - Purchased 10,000 dairy cows (average age at 1 October 2003, two years) for \$1 million.
 - Received a grant of \$400,000 towards the acquisition of the cows. This grant was non-returnable. During the year ending 30 September 2004 Sigma incurred the following costs:
 - \$500,000 to maintain the condition of the animals (food and protection).

Olea, 2012-12-06 Engineers and earth scientists are increasingly interested in quantitative methods for the analysis interpretation and modeling of data that imperfectly describe natural processes or attributes measured at geographical locations Inference from imperfect knowledge is the realm of classical statistics In the case of many natural phenomena auto and cross correlation preclude the use of classical statistics The appropriate choice in such circumstances is geostatistics a collection of numerical techniques for the characterization of spatial attributes similar to the treatment in time series analysis of auto correlated temporal data As in time series analysis most geostatistical techniques employ random variables to model the uncertainty that goes with the assessments The applicability of the methods is not limited by the physical nature of the attributes Geostatistics for Engineers and Earth Scientists presents a concise introduction to geostatistics with an emphasis on detailed explanations of methods that are parsimonious nonredundant and through the test of time have proved to work satisfactorily for a variety of attributes and sampling schemes Most of these methods are various forms of kriging and stochastic simulation The presentation follows a modular approach making each chapter as self contained as possible thereby allowing for reading of individual chapters reducing excessive cross referencing to previous results and offering possibilities for reviewing similar derivations under slightly different circumstances Guidelines and rules are offered wherever possible to help choose from among alternative methods and to select parameters thus relieving the user from making subjective calls based on an experience that has yet to be acquired Geostatistics for Engineers and Earth Scientists is intended to assist in the formal teaching of geostatistics or as a self tutorial for anybody who is motivated to employ geostatistics for sampling design data analysis or natural resource characterization Real data sets are used to illustrate the application of the methodology *Nonlinear Functional Analysis and its Applications* E. Zeidler, 2013-12-11 As long as a branch of knowledge offers an abundance of problems it is full of vitality David Hilbert Over the last 15 years I have given lectures on a variety of problems in nonlinear functional analysis

and its applications In doing this I have recommended to my students a number of excellent monographs devoted to specialized topics but there was no complete survey type exposition of nonlinear functional analysis making available a quick survey to the wide range of readers including mathematicians natural scientists and engineers who have only an elementary knowledge of linear functional analysis I have tried to close this gap with my five part lecture notes the first three parts of which have been published in the Teubner Texte series by Teubner Verlag Leipzig 1976 1977 and 1978 The present English edition was translated from a completely rewritten manuscript which is significantly longer than the original version in the Teubner Texte series The material is organized in the following way Part I Fixed Point Theorems Part II Monotone Operators Part III Variational Methods and Optimization Parts IV jV Applications to Mathematical Physics The exposition is guided by the following considerations a What are the supporting basic ideas and what intrinsic interrelations exist between them 3 In what relation do the basic ideas stand to the known propositions of classical analysis and linear functional analysis y What typical applications are there VII Preface viii Special emphasis is placed on motivation
