Navy Department,1957 **Cold and Chilled Storage Technology** C.V.J. Dellino,2012-12-06 The first edition of Cold and Chilled Storage Technology was prepared at a time when great changes were taking place in the industry that were hard to put into clear perspective For example the CFClozone layer problem was identified the Montreal Protocol was signed and experts from many disciplines were already proposing solutions to the problems seen at the time Not only were there the usual

differences in approach to the problems there were different understandings of the problems themselves For in stance some authoritative voices were saying HCFC 22 was part of the solution not part of the problem and recommending it as the main refrigerant for the future others said the opposite As editor I have taken the view that this should be a reference book and as such it should contain information that points in the direction of tried and proven good practice To avoid the risk of misdirecting readers I decided that the CFC issue was too unclear to be usefully discussed in the first edition and left it out altogether This was the main criticism of the first edition at the time of its publication but in view of the developments since then I stand by my decision to avoid premature comment in that instance The matter is discussed in this edition in Chapters 4 and 7 which include summaries of other related factors in a way that was certainly not possible in 1989 **Index of**

years like many people harboured the ambition to write a book For me the glass is always half full and with the experiences I have been through I finally plucked up the courage to put pen to paper This book was written partly out of the desire to share these experiences and partly to bring a smile to the faces of the readers who may or may not have had similar experiences It was built around a lessons learnt process of what I describe as a perfect storm in terms of what could go wrong when naively getting into something you are just not prepared for It is far from being aimed at business people as day to day life is relevant to the visitor and the business person alike Whilst this book is written about experiences in China there is a much deeper message out there of the importance of culture and business naivety and I am sure similar experiences will be relevant for others in any part of the world China is not a unique place to do business and live however it does come with cultural differences that many in the West have no ability to comprehend nor the desire to I hope you enjoy and finish this book with a smile on your face and for all of you on a long haul flight or journey hopefully a lot closer to your destination **Monthly**
