MARK SCHEME for the May/June 2013 series

0606 ADDITIONAL MATHEMATICS

0606/12

Paper 1, maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Numerical Simulation, An Art of Prediction 1 Jean-François Sigrist, 2019-12-18 Numerical simulation is a technique of major importance in various technical and scientific fields Used to understand diverse physical phenomena or to design everyday objects it plays a major role in innovation in the industrial sector Whilst engineering curricula now include training courses dedicated to it numerical simulation is still not well known in some economic sectors and even less so among the general public Simulation involves the mathematical modeling of the real world coupled with the computing power offered by modern technology Designed to perform virtual experiments digital simulation can be considered as an art of prediction Embellished with a rich iconography and based on the testimony of researchers and engineers this book shines a light on this little known art It is the first of two volumes and focuses on the principles methods and industrial practice of numerical modeling

Testing Times Willis Richard, 2014-02-07 This book focuses on the delivery of public examinations offered by the main examining boards in England since Victorian England The investigation reveals that the provision of examinations was as controversial in the nineteenth century as it is today particularly since the government is now determined to bring in reform The issues of grade inflation the place of coursework in marking and the introduction of

technological change all feature in this book Educational policy is primarily examined as well as some reference to the global scene The study analyses archival material from a wide range of sources including those records stored at the National Archives and the London Metropolitan Archives An emphasis is placed upon the various institutions that contributed to the process including the Royal Society of Arts the London Chamber of Commerce the City of Guilds of London Institute and the University of London Attention is given to the findings of the Taunton Commission and the Bryce Commission and shorter reports such as the Northcote Trevelyn Report which served to radicalise entry and recruitment to the Civil Service The modern GCSE and the plans for I levels are considered and key observations are made about the efficacy of those examinations offered by Oxford and Cambridge universities and O levels A levels and NVQs The reader is given every opportunity to benefit enthusiastically in this account of examinations and those engaged in education whether teachers examiners students or administrators will be able to gain useful insights into the workings of the examination system

The Truth About Our Schools Melissa Benn, Janet Downs, 2015-11-06 A superb crucial blistering expose of all the myths about our education system that are all too often used to attack it Melissa Benn again proves why she is one of country's most formidable education campaigners and why the powerful should fear her Owen Jones Guardian columnist and best selling author Never has it been more urgent to publicise the truth about what works and doesn't work in our education system Debunking the ideology of marketisation and exposing the half truths that pass for objective reporting Benn and Downs meticulously lay out the evidence that a national system of comprehensive schools delivers the best outcomes This hugely important book should be required reading for each new Education Secretary Caroline Lucas MP Opinions about comprehensive education are often made into easy to swallow sound bites by media and politicians alike and whilst the benefits of a genuinely comprehensive education for all pupils are obvious untruths have unwittingly evolved into hard facts Based on Melissa Benn and Janet Downs work as part of the pioneering Local Schools Network *The Truth About Our Schools* calls for us to urgently and articulately challenge unquestioned myths about state education Benn and Downs have meticulously built an argument for its still enormously vital role and rigorously challenge assumptions that Comprehensive education has failed Local authorities control and hold back schools Choice competition and markets are the route to educational success Choice will improve education in England the free school model Academies raise standards Teachers don't need qualifications Private schools have the magic DNA Progressive education lowers standards Anyone who thinks that comprehensive education cannot deliver that local authorities are the chief block to improving our school system that competition and markets are the route to educational success and that private schools hold the magic DNA that can simply be transferred to other state schools will have their beliefs shaken by this blisteringly incisive book
