Week One Topic: Drawing Materials and Equipment

Definition:

Technical Drawing is the use of drawing instruments, lines, letters, signs, and symbols to present ideas on a paper in the form of pictures or drawings, which only technicians can interpret and use to achieve their technical goals. The instruments used in Technical drawing work come in two forms namely drawing materials and drawing equipments.

1. **Drawing materials:** These are the instruments that the technician can carry along him wherever he wishes. They are easy to carry, because they are not usually heavy. Examples of drawing instruments are: pencil, eraser, stencil, Tee square, masking tape/pin, erasing shield, handkerchief/tissue paper, template, ruler, French curves, flexible curves, drawing sheet, compasses, divider, and glass paper/sharpener.
2. **Drawing equipment:** This has to do with most of the heavy instruments that the technician may not always carry about wherever he goes. Examples include drawing software, computer, camera, and drawing board.

Identification and uses of drawing instruments and materials

The uses of the materials and instrument mentioned above are briefly stated below:
