The Spectacle 2.0 Marco Briziarelli, Emiliana Armano, 2017-12-17 Spectacle 2.0 recasts Debord's theory of spectacle within the frame of 21st century digital capitalism. It offers a reassessment of Debord's original notion of Spectacle from the late 1960s of its posterior revisitation in the 1990s and it presents a reinterpretation of the concept within the scenario of contemporary informational capitalism and more specifically of digital and media labour. It is argued that the Spectacle 2.0 form operates as the interactive network that links through one singular but contradictory language and various imaginaries uniting diverse productive contexts such as logistics, finance, new media and urbanism. Spectacle 2.0 thus colonizes most spheres of social life by processes of commodification, exploitation and reification. Diverse contributors consider the topic within the book's two main sections. Part I conceptualizes and historicizes the Spectacle in the context of informational capitalism; contributions in Part II offer empirical cases that historicise the Spectacle in relation to the present and recent past, showing how a Spectacle 2.0 approach can illuminate and deconstruct specific aspects of contemporary social reality. All contributions included in this book rework the category of the Spectacle to present a stimulating compendium of theoretical critical literature in the fields of media and labour studies. In the era of the gig economy, highly mediated content and President Trump, Debord's concept is arguably more relevant than ever. *The Routledge Companion to the Contemporary Musical* Jessica Sternfeld, Elizabeth L. Wollman, 2019-08-16 The Routledge Companion to the Contemporary Musical is dedicated to the musical's evolving relationship to American culture in the late twentieth and early twenty-first centuries. In the past decade and a half, international scholars from an ever-widening number of disciplines and specializations have been actively contributing to the interdisciplinary field of musical theater studies. Musicals have served not only to mirror the sociopolitical, economic and cultural tenor of the times but have helped shape and influence it in America and across the globe, a genre that may seem at first glance light-hearted and escapist serves also as a bold commentary on society. Forty-four essays examine the contemporary musical as an ever-shifting product of an ever-changing culture. This volume sheds new light on the American musical as a thriving contemporary performing arts genre, one that could have died out in the post-Tin Pan Alley era but instead has managed to remain culturally viable and influential in part by newly embracing a series of complex contradictions. At present, the American musical is a live, localized, old-fashioned genre that has simultaneously developed into an increasingly globalized, tech-savvy, intensely mediated mass entertainment form. Similarly, as it has become increasingly international in its scope and appeal, the stage musical has also become more firmly rooted to Broadway, the idea if not the place, and thus branded as a quintessentially American entertainment. **Internet and Surveillance** Christian Fuchs, Kees Boersma, Anders Albrechtslund, Marisol Sandoval, 2013-06-17 The Internet has been transformed in the past years from a system primarily oriented on information provision into a medium for communication and community building. The notion of Web 2.0, social software and social networking sites such as Facebook, Twitter and MySpace have emerged in this

context With such platforms comes the massive provision and storage of personal data that are systematically evaluated marketed and used for targeting users with advertising In a world of global economic competition economic crisis and fear of terrorism after 9 11 both corporations and state institutions have a growing interest in accessing this personal data Here contributors explore this changing landscape by addressing topics such as commercial data collection by advertising consumer sites and interactive media self disclosure in the social web surveillance of file sharers privacy in the age of the internet civil watch surveillance on social networking sites and networked interactive surveillance in transnational space This book is a result of a research action launched by the intergovernmental network COST European Cooperation in Science and Technology

Memory Unbound Lucy Bond, Stef Craps, Pieter Vermeulen, 2016-11-01 Though still a relatively young field memory studies has undergone significant transformations since it first coalesced as an area of inquiry Increasingly scholars understand memory to be a fluid dynamic unbound phenomenon a process rather than a reified object Embodying just such an elastic approach this state of the field collection systematically explores the transcultural transgenerational transmedial and transdisciplinary dimensions of memory four key dynamics that have sometimes been studied in isolation but never in such an integrated manner Memory Unbound places leading researchers in conversation with emerging voices in the field to recast our understanding of memory's distinctive variability

Reckoning with Social Media Aleena Chia, Ana Jorge, Tero Karppi, 2021-11-04 Once celebrated for connecting people and circulating ideas social media are facing mounting criticisms about their anticompetitive reach addictive design and toxicity to democracy Known cumulatively as the techlash journalists users and politicians are asking social media platforms to account for being too big too engaging and too unruly In the age of the techlash strategies to regulate how platforms operate technically economically and legally are often stacked against individual tactics to manage the effects of social media by disconnecting from them These disconnection practices from restricting screen time and detoxing from device use to deleting apps and accounts often reinforce rather than confront the ways social media organize attention everyday life and society Reckoning with Social Media challenges the prevailing critique of social media that pits small gestures against big changes that either celebrates personal transformation or champions structural reformation This edited volume reframes evaluative claims about disconnection practices as either restorative or reformatory of current social media systems by beginning where other studies conclude the ambivalence commodification and complicity of separating from social media

Timon Beyes, Robin Holt, Claus Pias, 2019-12-17 Our most basic relationship with the world is one of technological mediation Nowadays our available tools are digital and increasingly what counts in economic social and cultural life is what can be digitally stored distributed replayed augmented and switched Yet the digital remains very much materially configured and though it now permeates nearly all human life it has not eclipsed all older technologies This Handbook is grounded in an understanding that our technologically mediated condition is a condition of organization It maps and theorizes the largely uncharted territory of media technology and organization studies Written by scholars of organization and theorists of media and technology the chapters focus on specific and specifically mediating objects that shape the practices processes and effects of organization It is in this spirit that each chapter focuses on a specific technological object such as the Battery Clock High Heels Container or Smartphone asking the question how does this object or process organize In staying with the object the chapters remain committed to the everyday empirical world rather than being confined to established disciplinary concerns and theoretical developments As the first sustained and systematic interrogation of the relation between technologies media and organization this Handbook consolidates deepens and further develops the empirics and concepts required to make sense of the material forces of organization 100 Greatest Video Game Characters Jaime Banks, Robert Mejia, Aubrie Adams, 2017-06-23 Though in existence for only a few decades video games are now firmly established in mainstream culture all around the planet Every year new games are produced and every year new favorites emerge But certain characters have become so iconic that they withstand both time and the shifting interests of players Such creations

Our families are being turned into data as the digital traces we leave are shared, sold, and commodified. Children are datafied even before birth with pregnancy apps and social media postings and then tracked through babyhood with learning apps, smart home devices, and medical records. If we want to understand the emergence of the datafied citizen, Veronica Barassi argues, we should look at the first generation of datafied natives: our children. In *Child Data Citizen*, she examines the construction of children into data subjects, describing how their personal information is collected, archived, sold, and aggregated into unique profiles that can follow them across a lifetime.

The Theatre of Paula Vogel Lee Brewer Jones, 2023-06-15 In this volume, Lee Brewer Jones examines Paula Vogel as both a playwright and renowned teacher, analyzing texts and early reviews of Vogel's major plays, including *Indecent*, *Desdemona*, *How I Learned to Drive*, and *The Baltimore Waltz*, before turning attention to her influence upon other major American playwrights, including Sarah Ruhl, Lynn Nottage, and Quiara Algría. Hudes' chapters explore Vogel's plays in chronological order, consider her early influences, and offer detailed accounts of her work in performance. Enriched by an interview with Lynn Nottage and essays from scholars Ana Fernández Caparrós and Amy Muse, this is a vibrant exploration of Paula Vogel as a major American playwright. By the time Paula Vogel made her Broadway debut with her 2017 Rebecca Taichman collaboration *Indecent*, she was already an accomplished playwright with a Pulitzer Prize for *How I Learned to Drive* (1998) and two Obie Awards. She had also enjoyed a brilliant career as a professor at Brown and Yale, with students such as Sarah Ruhl, a MacArthur Genius Grant winner, Pulitzer Prize winners Nilo Cruz and Quiara Algría, and the only woman to win two Pulitzers for Drama, Lynn Nottage. Vogel's theatre draws upon Russian Formalist Viktor Shklovsky and uses devices such as defamiliarization and negative empathy to challenge conventional definitions of protagonists and antagonists.
