The Proof Stage Stephen Abbott, 2023-07-11 How playwrights from Alfred Jarry and Samuel Beckett to Tom Stoppard and Simon McBurney brought the power of mathematics to life on the stage The discovery of alternate geometries paradoxes of the infinite incompleteness and chaos theory revealed that despite its reputation for certainty mathematical truth is not immutable perfect or even perfectible Beginning in the last century a handful of adventurous playwrights took inspiration from the fractures of modern mathematics to expand their own artistic boundaries Originating in the early avant garde mathematics infused theater reached a popular apex in Tom Stoppard's 1993 play *Arcadia* In *The Proof Stage* mathematician Stephen Abbott explores this unlikely collaboration of theater and mathematics He probes the impact of mathematics on such influential writers as Alfred Jarry Samuel Beckett Bertolt Brecht and Stoppard and delves into the life and mathematics of Alan Turing as they are rendered onstage The result is an unexpected story about the mutually illuminating relationship between proofs and plays from Euclid and Euripides to G del and Godot Theater is uniquely poised to discover the soulful human truths embedded in the austere theorems of mathematics but this is a difficult feat It took Stoppard twenty five years of experimenting with the creative possibilities of mathematics before he succeeded in making fractal geometry and chaos theory integral to *Arcadia*'s emotional arc In addition to charting Stoppard's journey Abbott examines the post *Arcadia* wave of ambitious works by Michael Frayn David Auburn Simon McBurney Snoo Wilson John Mighton and others Collectively these gifted playwrights transform the great philosophical upheavals of mathematics into profound and sometimes poignant revelations about the human journey

Theatre Symposium, Vol. 27 Sarah McCarroll, 2019-10-08 A substantive exploration of bodies and embodiment in theatre Theatre is inescapably about bodies By definition theatre requires the live bodies of performers in the same space and at the same time as the live bodies of an audience And yet it's hard to talk about bodies We talk about characters we talk about actors we talk about costume and movement But we often approach these as identities or processes layered onto bodies rather than as inescapably entwined with them Bodies on the theatrical stage hold the power of transformation Theatre practitioners scholars and educators must think about what bodies go where onstage and what stories which bodies to tell The essays in Theatre Symposium Volume 27 explore a broad range of issues related to embodiment The volume begins with Rhonda Blair's keynote essay in which she provides an overview of the current cognitive science underpinning our understanding of what it means to be embodied and to talk about embodiment She also provides a set of goals and cautions for theatre artists engaging with the available science on embodiment while issuing a call for the absolute necessity for that engagement given the primacy of the body to the theatrical act The following three essays provide examinations of historical bodies in performance Timothy Pyles works to shift the common textual focus of Racinean scholarship to a more embodied understanding through his examination of the performances of the young female students of the Saint Cyr academy in two of Racine's Biblical plays Shifting forward in time by three centuries Travis Stern's exploration of the auratic celebrity of baseball player Mike Kelly uncovers the ways in which bodies may retain the ghosts of their former selves long after physical ability and wealth are gone Laurence D Smith's investigation of actress Manda Björling's performances in Miss Julie provides a model for how cognitive science in this case theories of cognitive blending can be integrated with archival theatrical research and scholarship From scholarship grounded

in analysis of historical bodies and embodiment the volume shifts to pedagogical concerns Kaja Amado Dunn's essay on the ways in which careless selection of working texts can inflict embodied harm on students of color issues an imperative call for careful and intentional classroom practice in theatre training programs Cohen Ambrose's theorization of pedagogical cognitive ecologies in which subjects usually taught disparately acting theatre history costume design for example could be approached collaboratively and through embodiment speaks to ways in which this call might be answered Tessa Carr's essay on The Integration of Tuskegee High School brings together ideas of historical bodies and embodiment in the academic theatrical context through an examination of the process of creating a documentary theatre production The final piece in the volume Bridget Sundin's exchange with the ghost of Marlene Dietrich is an imaginative exploration of how it is possible to open the archive to create new spaces for performance scholarship via an interaction with the body

Adaptation and Nation Catherine Rees, 2017-11-17 This book focuses on modern theatrical adaptations that rework classic plays in new British and Irish settings It explores these shifted national contexts and examines what they might reveal about the political and cultural climate of the new setting In examining the modern setting alongside the country of the original text it also reveals fascinating resonances between two different national contexts The book discusses five British and Irish playwrights and their current adaptations examining well known dramatists such as Martin McDonagh Sarah Kane and Brian Friel while analysing some of their less well known plays offering a novel examination of the adaptation process The book further provides an insightful commentary on some significant events of the twentieth century in Britain and Ireland such as the historic Labour victory of 1945 and scandals in the Royal Family since the 1990s This book will appeal to theatre and performance enthusiasts as well as students and scholars of both theatre and adaptation

Trance Forms Ronaldo Morelos, 2010-05-21 This study investigates forms of theatre performance practice and training that can be seen to employ trance states or engage the concept of states of consciousness as performative practice Trance is considered to be the result of sustained involvement with detailed information that is structurally organised invoking imaginative and affective engagements that are maintained as interactions between the performer other performers the environment and audience of the performance This thesis investigates trance performance through the conceptual lens of dramatic arts practice In their respective cultural contexts trance and theatre attain qualities considered as sacredness Trance practice and performance across a range of cultural contexts are analysed as social processes as elements of power relations that influence the performer audience and environment of the performance As performance traditions and events

this study will examine strands of praxis that can be drawn from Constantin Stanislavski to Lee Strasberg to Mike Leigh from Antonin Artaud to Samuel Beckett and Jerzy Grotowski from the Balinese trance performance form of Sanghyang Dedari in the 1930s to the 1990s from the Channeling practitioners in the U S in the 1930s to Seth and Lazaris in the 1970s to the 1990s and from traditions of military training performance violence and rhetoric associated with the attacks of the 11th of September 2001 in the U S and its aftermath
