Radio-electronics ,1978 **Japanese Technical Literature Bulletin** ,1993 **StarBriefs 2001** ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions **Directory** ,1992 *Official Gazette of the United States Patent and Trademark Office* ,2002 **Billboard** ,1974-08-17 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends **Financial Intermediation and Deregulation** Tobias Miarka,2012-12-06 The author develops a model of bank firm relationships on the basis of the following general idea Banks want to prevent moral hazard on the side of their customers In particular they want to prevent their business customers to use bank credit for purposes different from those that have been negotiated thus damaging the bank s interest The idea of this model is relatively simple Banks do not extend a loan if the project for which the money is intended will probably be un profitable They extend the loan if the success of the project is highly probable and if the revenues from that project are greater than the expenses of the bank for monitoring the customer Assuming as Miarka does that the results from a successful project are certain this model is an equivalent to minimizing monitoring costs In fact this is the outcome of the model The banks are known to monitor their loans They thereby signal to the capital market that they have tested the project Therefore the buyer of bonds of the company on the capital market may rest assured that the project is financially sound The buyers of bonds thus avoid monitoring costs and can grant better credit conditions than the banks Purchasers of bonds are free riders on the monitoring of the banks Miarka tests his model econometrically The results are amazingly supportive of the model **Direct Marketing List Source** ,1994-02 **Electronic Technician** ,1962 *The ...
