CYLINDERS

Front Cylinder

Rear Cylinder

CAUTION: Lower bucket to the ground and shut off tractor engine before servicing the loader.

The above illustrations show cross-sectional views of the bucket and boom lift cylinders. If the parts are removed for service, they must be replaced in the manner illustrated.

Wash cylinder thoroughly before taking it

apart. The internal parts have been machined to a high finish and must be handled carefully.

Be sure the parts are free from dust or foreign material and are well lubricated before re-assembling the cylinder.

CAUTION: When cleaning machine parts with kerosene or diesel fuel, be sure the working area is well ventilated, and away from sparks and flames.

DETACHING AND ATTACHING

DETACHING QUALITATCH LOADER

CAUTION: Escaping hydraulic oil under pressure can cause personal injury; therefore be sure all connections are tight and that lines, hoses, and hoses are not damaged. Before disconnecting lines or pipes in the loader hydraulic system, be sure to relieve all hydraulic pressure.

These instructions and illustrations cover the loader equipped with shafts and mounting guide cones. If the loader is not equipped with shafts and mounting guide cones, follow the same procedures, however, the loader must be lifted and pulled away from the mounting brackets with a chain hoist.

When detaching the loader equipped with shafts measure 30-in or 40-inch material to be cut, additional weight is needed in the bucket. Place weight in the bucket, as needed, as the loader will rise off the mounting brackets when the shafts are cut.

CAUTION: Be sure front mounting bracket retaining pin is attached securely to the front mounting bracket.

Remove four 5/4 x 3-1/4-inch cap screws from loader frame and rear mounting brackets.

Move boom control lever rearward until bucket is raised clear of the rear mounting brackets.

Detach the loader shafts, move the boom control lever forward until the weight of the bucket is supported by the shafts. Place lever in float position.

DISCONNECTING HYDRAULIC HOSES

Loader Using Tractor Selection Control Valve

John Deere 1000 BT and BT, 1120, and 2000 BT and BT Tractors

Remove hydraulic hoses from tractor frame and engine.

Replace dust caps on loader hydraulic lines and insert dust plugs in tractor engine connections.
