

Evolution and Selection

What mechanisms lead to changes in the diversity of species on Earth?

Why?

People make choices by selecting options they like best. The natural world also 'selects' (although not as a conscious decision) when environmental conditions allow organisms with a particular genetic trait to live healthier lives than other organisms. In this activity, we will explore how selection affects populations overtime.

Model 1 – Desktop Swab Results

1. What is the source of the bacteria in the culture tube in Model 1?

The bacteria in model 1 comes from the top of a desktop so it most likely came from human sources that have contact with the desk top.

2. How many genetic variants of *E. coli* were present in the culture from the initial swab?

There were four genetic variants of *E. coli* present in the initial swab.

3. What variants of *E. coli* are found on the dish grown without triclosan?

All four variants of *E. coli* are found on the dish grown without the triclosan.

4. Refer to the dish in Model 1 with the medium that included triclosan.

- a. What variants of *E. coli* are found on the dish grown with triclosan?

The only variant of *E. coli* found on the dish grown with triclosan is Variant S.

- b. What likely happened to the other variants of *E. coli* on the dish with the medium containing triclosan?

The other bacteria was likely killed by the triclosan.

in their writing Students who wrote authentically expressed intentions of pursuing professional biological research Third biological sciences education students were found to have composite identities based on personal and professional affiliations which either hindered or enhanced their motivation to resolve evolution misconceptions Students personal affiliations to religious communities of practice did not hinder their motivation to understand evolution However students fears of a not being able to resolve competing religious and scientific explanations for diversity of life and or b not being prepared to defend evolution concepts to their employers and students were factors that influenced their motivation to learn Biological sciences education students appeared to identify themselves as sharers of scientific knowledge not as producers of scientific knowledge I posit that identity plays a role in the conceptual change process **Science Foundation Course** ,1970
