

Evolution Study Guide

1. Name three men whose ideas contributed to Darwin's theory (other than Darwin), and tell what they had to say.

Lamarck- species change over time

Malthus- the number of people in the human population increases faster than the food supply

Wallace – proposed a theory a lot like Darwin's theory of natural selection

2. What specifically, did Darwin observe on the Galapagos islands that led him to develop the theory of natural selection?

Different species of birds were very similar to each other and to mainland birds, but they were each adapted to use a different food source and live in differing environmental conditions

3. State the four points of Darwin's Theory.

- a. Variations exist in a population
- b. The best adapted to an environment survive.
- c. They reproduce and pass on their genes
- d. The fossil record supports this idea.

4. Define:

- a. natural selection- the environment "decides" which individuals in a population are best adapted to it because they will survival & successfully reproduce
- b. adaptation- any change in physical appearance or behavior that helps the members of a population to survive
- c. speciation- formation of a new species from an existing one
- d. reproductive isolation- when members of two different species cannot or will not breed together.
- e. paleontologist- one who studies fossils

5. Contrast gradualism with punctuated equilibrium.

Gradualism- a slow change in a population over time

Punctuated equilibrium- a long period of no changes in a population followed by a period of rapid change, producing new species (usually due to a severe change in the environment)

6. In what way did Darwin's finches vary from each other? What did Darwin think was the cause of the variations? The birds vary in color and patterns in their feathers and in the type and size of their beaks. Darwin thought this was due to where they lived, but especially to what they ate.

7. What is a nonrandom mating type selection?

Inbreeding- choosing a mate from the local population, happens when a population is isolated

Outbreeding- deliberately choosing a mate from a nonlocal population

Choosing a mate for some "desirable" characteristic in the possible mate instead of randomly.

The TOGAF® Enterprise Architecture Foundation Study Guide Andrew Josey, The Open Group, 2023-04-10. The TOGAF Standard, a standard of The Open Group, is a proven Enterprise Architecture methodology and framework used by the world's leading organizations to improve business efficiency. The TOGAF Certification Program has enabled more than 100,000 Enterprise Architects and trainers around the globe to demonstrate their proven knowledge of the framework and method. This is the book you need to prepare for the TOGAF Enterprise Architecture Foundation qualification. This edition is aligned to the TOGAF Standard 10th Edition. It includes an overview of every learning outcome included in the TOGAF Enterprise Architecture Level 1 Syllabus and in-depth coverage on preparing and taking the TOGAF Enterprise Architecture Part 1 examination. It includes Key Learning Points and challenging Test Yourself questions for each part of the syllabus together with a Test Yourself examination paper that you can use to test your readiness to take the official TOGAF Enterprise Architecture Part 1 examination. The audience for this Study Guide is individuals who need a basic understanding of a proven Enterprise Architecture methodology. Professionals who work for or join an organization applying the TOGAF Standard. Individuals who need to start to learn the TOGAF method. Individuals who want to achieve the TOGAF Enterprise Architecture Practitioner qualification in a stepwise manner or other certifications and certification credentials from The Open Group where this certification is a prerequisite. A prior knowledge of Enterprise Architecture is advantageous but not required. Topics covered include: An introduction to TOGAF certification and the TOGAF Enterprise Architecture Foundation qualification including the TOGAF Enterprise Architecture Part 1 examination. The concepts of Enterprise Architecture and the TOGAF Standard. The key terminology of the TOGAF Standard. The Architecture Development Method (ADM) cycle and the objectives of each phase and how to adapt and scope the ADM for use. The techniques available to support the ADM. Applying the ADM including iteration, partitioning, and application in a digital enterprise. How Architecture Governance contributes to architecture development. Architecture content: the outputs produced while executing the ADM.
