Chandra's Cosmos Wallace H. Tucker, 2017-03-28 On July 23 1999 the Chandra X Ray Observatory the most powerful X ray telescope ever built was launched aboard the space shuttle Columbia Since then Chandra has given us a view of the universe that is largely hidden from telescopes sensitive only to visible light In Chandra's Cosmos the Smithsonian Astrophysical Observatory's Chandra science spokesperson Wallace H Tucker uses a series of short connected stories to describe the telescope's exploration of the hot high energy face of the universe The book is organized in three parts The Big covering the cosmic web dark energy dark matter and massive clusters of galaxies The Bad exploring neutron stars stellar black holes and supermassive black holes and The Beautiful discussing stars exoplanets and life Chandra has imaged the spectacular glowing remains of exploded stars and taken spectra showing the dispersal of their elements Chandra has observed the region around the supermassive black hole in the center of our Milky Way and traced the separation of dark matter from normal matter in the collision of galaxies contributing to both dark matter and dark energy studies Tucker explores the implications of these observations in an entertaining informative narrative aimed at space buffs and general readers alike

Thermal Cameras in Science Education Jesper Haglund, Fredrik Jeppsson, Konrad J. Schönborn, 2022-03-15 This book presents a collection of educational research and developmental efforts on the rapidly

emerging use of infrared cameras and thermal imaging in science education It provides an overview of infrared cameras in science education to date and of the physics and technology of infrared imaging and thermography It discusses different areas of application of infrared cameras in physics chemistry and biology education as well as empirical research on students interaction with the technology It ends with conclusions drawn from the contributions as a whole and a formulation of forward looking comments

Physics of the Human Temporality Ihor Lubashevsky, Natalie Plavinska, 2021-10-21 This book presents a novel account of the human temporal dimension called the human temporality and develops a special mathematical formalism for describing such an object as the human mind One of the characteristic features of the human mind is its temporal extent For objects of physical reality only the present exists which may be conceived as a point like moment in time In the human temporality the past retained in the memory the imaginary future and the present coexist and are closely intertwined and impact one another This book focuses on one of the fragments of the human temporality called the complex present A detailed analysis of the classical and modern concepts has enabled the authors to put forward the idea of the multi component structure of the present For the concept of the complex present the authors proposed a novel account that involves a qualitative description and a special mathematical formalism This formalism takes into account human goal oriented behavior and uncertainty in human perception The present book can be interesting for theoreticians physicists dealing with modeling systems where the human factor plays a crucial role philosophers who are interested in applying philosophical concepts to constructing mathematical models and psychologists whose research is related to modeling mental processes

Who's In? Who's Out?, 2018-12-24

Who's in? Who's out? Who decides? What are we going to do about inclusive education? What kind of world do we want our children to live in? How might education help us to achieve that vision for our children? In *Who's In? Who's Out?* What to Do about Inclusive Education, a group of respected international scholars come together to think about education at a momentous time in global history where the world has fractured, people are displaced, and we search for new research, education programmes, and political leadership to restore social cohesion and rebuild school systems that may claim to be an apprenticeship in democracy. This book highlights the challenges inclusive education researchers take on in working to dismantle barriers involving access, presence, participation, and success in education. Contributors include Elga Andriana, Michael Apple, Ann Cheryl Armstrong, Marnie Best, Roseanna Bourke, Jenni Carter, Kathy Cologon, Tim Corcoran, Deborah Crossing, Simona D'Alessio, Rosemary Ann du Plessis, David Evans, Lani Florian, Cameron Forrest, Christine Grima, Farrell Björn F.
