Writing Effective Course Assignments Elia Shabani Mligo, 2017-05-11 Non degree and undergraduate students are both inexperienced essay writers who need close guidance to become effective writers One of the puzzles which they encounter at the college and university after reporting for studies is the course assignments offered to them by their lecturers which demand them to be critical thinkers and argumentative essay writers In most colleges and universities lecturers provide to students broad questions to answer in the form of essays either in group or individual assignments How should they turn the broad assignment questions provided to them by their lecturers into specific researchable topics for essays How should they handle literature in order to obtain valuable information to answer the provided question How should they construct an informed and convincing argument using the collected information as evidence This book concerns these and other related questions With its clear illustrations the book is designed to be a self study guide and to offer solutions to many struggling students in colleges and universities At the same time the book can be helpful for lecturers to instruct their students how to write effective course assignments in their respective courses *Writing Assignments Across University Disciplines* Roger Graves, 2017-12-07 Writing Assignments Across the University Curriculum as a whole asks and answers these questions What kinds of documents do students write in a wide range of university degree programs in Canada How do instructors structure those writing assignments That is who is the audience for the assignments Do students get formative feedback as they develop their documents Do the patterns we found in a small liberal arts college Graves Hyland and Samuels 2010 occur in other kinds of universities We took our cue from an article by Anson and Dannels 2009 who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program Consequently we needed to map the writing assignments according to how different departments organized these degree programs Results that were organized by curricular unit departments faculties or colleges or programs units were more significant than general statistics because students would progress through these courses to a degree Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering Education and an entire small university The last two chapters report on the instructors perspective on their assignments what they were intending to do and why they both resisted and engaged in curricular discussions Writing the Classroom Stephen E. Neaderhiser, 2022-11-21 Writing the Classroom explores how faculty compose and use pedagogical documents to establish classroom expectations and teaching practices as well as to articulate the professional identities they perform both inside and outside the classroom The contributors to this unique collection employ a wide range of methodological frameworks to demonstrate how pedagogical genres even ones as seemingly straightforward as the class syllabus have lives extending well beyond the classroom as they become part of how college teachers represent their own academic identities advocate for pedagogical values and negotiate the many external forces that influence the act of teaching Writing the Classroom shines a

light on genres that are often treated as two dimensional with purely functional purposes arguing instead that genres like assignment prompts course proposals teaching statements and policy documents play a fundamental role in constructing the classroom and the broader pedagogical enterprise within academia Writing the Classroom calls on experienced teachers and faculty administrators to critically consider their own engagement with pedagogical genres and offers graduate students and newer faculty insight into the genres that they may only now be learning to inhabit as they seek to establish their personal teacherly identities It showcases the rhetorical complexity of the genres written in the service of pedagogy not only for students but also for the many other audiences within academia that have a role in shaping the experience of teaching Contributors Michael Albright Lora Arduser Lesley Erin Bartlett Logan Bearden Lindsay Clark Dana Comi Zack K De Piero Matt Dowell Amy Ferdinandt Stolley Mark A Hannah Megan Knight Laura R Micciche Cindy Mooty Dustin Morris Kate Navickas Kate Nesbit Jim Nugent Lori A Ostergaard Cynthia Pengilly Jessica Rivera Mueller Christina Saidy Megan Schoen Virginia Schwarz Christopher Toth
