Project Scope Document

Project Title	
Project Leader	

Details of Project

Project Aim and Purpose
<i>Detail the overall aim and purpose of the project. This should be a short statement that captures exactly what the project has to accomplish, (e.g. implement a new performance management system to be used throughout the organisation).</i>
Project Objectives
<i>Detail what will be delivered as a result of the project, (e.g. a software system to record performance information and produce metrics; a training package to upskill all managers to use the new system).</i>
Out of Scope
<i>Detail what will not be delivered as a part of the project (e.g. access for front-line staff; functionality to complete performance review forms online).</i>
Benefits Identification
<i>Detail the benefits that this project will bring to the organisation and the wider NHS (e.g. a consistent approach to performance management throughout the organisation; time saved on producing performance information).</i>
Research of Previous/Existing Projects
<i>Detail the research undertaken to review previous/existing projects? Is there any existing documentation you could learn from or adapt? Are there any outputs from that project that you could re-use?</i>
Equality & Diversity
<i>Which groups of the NHS is this project targeted? Which groups of the population will ultimately benefit from this project?</i>

document control system DCS or documented information control system DICS is the foundation of a quality management system. It is the first quality system element that must be implemented because the establishment and control of documented processes and information in a quality controlled environment is dependent on the ability to proactively manage access to documents and the movement of documents through the document life cycle. A well developed document control system benefits business by Improving knowledge retention and knowledge transfer within and across business units. Improving access to knowledge based information. Improving employee performance by providing standardized processes and communicating clear expectations. Improving customer communication and satisfaction by providing documented information from which common understanding can be achieved. Providing traceability of activities and documentation throughout the organization. Improving organization of and access to documents and data. Sample documents are included in the appendixes of this book to help clarify explanations and a full set of formatted procedures and document templates are available for download to get you off to an even faster start. This book provides a process based approach that can be used for controlling all forms of documented information that are required to be managed under the quality management system.

Engineers' Guide to Technical Writing Kenneth G. Budinski, 2001-01-01. Annotation: An engineer with experience in the automotive and chemical process industries Budinski has compiled material he used to train new engineers and technicians in an attempt to get his co workers to document their work in a reasonable manner. He does not focus on the mechanics of the English language but on the types of documents that an average technical person will encounter in business government or industry. He also thinks that students with no technical background should be able to benefit from the tutorial.

Cost and Value Management in Projects Ray R. Venkataraman, Jeffrey K. Pinto, 2023-03-03.
