

ECONOMIC IMPLICATIONS OF IMMIGRATION

Introduction

To underscore the significance of immigration reform, one has to first acknowledge the significance of its history to understand why it has to be reformed. The liberalization of immigration policy reflected in President Lyndon B. Johnson's 1965 legislation can be understood as part of the evolutionary trend in federal policy after World War II to end legal discrimination based on race and ethnicity (Center for Immigration Studies, 1995). Essentially, the immigration bill was mainly seen as an extension of the civil rights movement (Center for Immigration Studies, 1995). At that time, legal discrimination against any specific individual or group of individuals was seen as unconstitutional. Prior to the liberalization, there were strict limitations on an immigrant's entry into the United States. Under the old system first instituted in 1921, admission largely depended on an immigrant's country of birth, family reunification and needed skills (Center for Immigration Studies, 1995). Seventy percent of all immigrant slots were allotted to natives of just 3 countries-the United Kingdom, Ireland, and Germany-and went mostly unused, while there were long waiting lists for the small number of visas available to those born in Italy, Greece, Poland, Portugal, and elsewhere in eastern and southern Europe (Center for Immigration Studies, 1995). In any case, the new system virtually eliminated the various national origins quota system putting people of all nations on an equal footing for immigration to the U.S. (Center for Immigration Studies, 1995). Thus, this new legislation created the foundation of current immigration law which as a result, commenced a new era of mass immigration (Center for Immigration Studies, 1995). Furthermore, this new, augmented immigration flow came from countries in Asia and Latin America ushering in millions of both legal and illegal immigrants to the U.S.
