

- On peut distinguer :
  - Les sciences formelles : c'est le cas des mathématiques et de la logique qui s'appuient sur des déductions. Il n'y a pas de vérification par l'expérience.
  - Les sciences expérimentales ou empiriques : sciences physiques, chimie, sciences de la nature, biologie, la médecine... Elles cherchent à établir à l'aide des mathématiques, des « lois » ou des rapports constants, pour décrire les relations entre différents phénomènes. Les travaux sont validés par contrôles expérimentaux.
  - Les sciences humaines : la psychologie, la sociologie, l'histoire linguistique, les sciences politiques... Lorsqu'on leur applique les méthodes et les langages des sciences expérimentales. Elles deviennent, alors, un cas particulier des sciences naturelles. La nature même de leur objet.
- Le progrès scientifique : est le nom donné au développement des connaissances scientifiques. Le progrès technique est, dans une large mesure, dépendant des avancées scientifiques.
- On peut situer l'origine du progrès scientifique au début de l'Histoire, à partir du moment où l'Homme a pu formaliser les connaissances sur des supports écrits. Dans les grandes civilisations, que ce soit celles issues du christianisme, de l'Islam ou d'autres religions, le progrès scientifique était intimement lié à la religion. Il a pris une tournure nouvelle à partir du 21<sup>ème</sup> siècle, lorsque le savant Galilée a été jugé pour hérésie en raison de ses positions sur l'héliocentrisme. A partir de ce moment, la relation entre la science et la religion a été remise en cause.

Nous vivons au début du 21<sup>ème</sup> siècle et les progrès de la science et de la technologie s'accomplissent si rapidement que nous ne sommes pas capables de les suivre dans tous les domaines. Aujourd'hui, nous sommes entourés de découvertes de la science et de la technologie à chaque pas, nous nous en servons tous les jours. Par exemple, l'utilisation de nouvelles technologies a fait augmenter la productivité. Les moyens de transport modernes nous permettent de nous déplacer plus rapidement. Les moyens de communication permettent d'être en contact avec nos proches à n'importe quel endroit de la planète dans un instant. Le téléphone portable, le fax, le courrier électronique ont transformé le monde en un grand village. De ce point de vue, on peut dire que ces nouveautés technologiques sont nécessaires et bénéfiques pour nous. Mais, elles entraînent aussi la pollution, les catastrophes écologiques, la disparition de certaines espèces animales et végétales. Cela montre que notre planète est malade et maltraitée par les Hommes.
