Manual Myf Notebook Galileo:

Domingo de Soto and the Early Galileo William A. Wallace, 2018-01-18 The unifying theme in this second volume of essays by William A Wallace to be published in the Variorum series is signaled in the title of the opening paper Domingo de Soto and the Iberian roots of Galileo's science The seven essays in the first part provide textual studies of Soto's early formulations of the laws of falling bodies the context in which they were developed in the 16th century and the ways in which they were transmitted in Spain and Portugal to the early 17th century mainly by Jesuit scholars The following essays focus on the young Galileo and his work at Pisa and Padua leading to his discovery of the law of uniform acceleration in free fall Textual evidence is presented for an indirect influence of Soto's work on Galileo mediated by Jesuits who were teaching at Padua in the first decade of the 17th century
