Caught in the CROSS-Fire Michael Kenneth Wilson, 2025-07-31 There are insidious forces threatening to shape people s lives in ways that may or may not meet with their approval and certainly do not meet with God s the ultimate judge Over many centuries it has been common to name these radical forces as the world the flesh and the devil This book deals with the nature and impact of these highly dangerous forces and what is involved in successfully countering them **Autophagy in plants and algae** Diane C Bassham, Jose L Crespo, 2015-05-15 Autophagy also known as macroautophagy is an evolutionarily conserved process by which cytoplasmic components are nonselectively enclosed within a double membrane vesicle known as the autophagosome and delivered to the vacuole for degradation of toxic components and recycling of needed nutrients

This catabolic process is required for the adequate adaptation and response of the cell and correspondingly the whole organism to different types of stress including nutrient starvation or oxidative damage Autophagy has been extensively investigated in yeasts and mammals but the identification of autophagy related ATG genes in plant and algal genomes together with the characterization of autophagy deficient mutants in plants have revealed that this process is structurally and functionally conserved in photosynthetic eukaryotes Recent studies have demonstrated that autophagy is active at a basal level under normal growth in plants and is upregulated during senescence and in response to nutrient limitation oxidative stress salt and drought conditions and pathogen attack Autophagy was initially considered as a non selective pathway but numerous observations mainly obtained in yeasts revealed that autophagy can also selectively eliminate specific proteins protein complexes and organelles Interestingly several types of selective autophagy appear to be also conserved in plants and the degradation of protein aggregates through specific adaptors or the delivery of chloroplast material to the vacuole via autophagy has been reported This research topic aims to gather recent progress on different aspects of autophagy in plants and algae We welcome all types of articles including original research methods opinions and reviews that provide new insights about the autophagy process and its regulation *MacRae's Blue Book* ,1989 *MacRae's Industrial Directory* ,1995 *Forest Science* ,2015 **Spring Break 16** Sharon Publications,1986-01-01
