drawings are fully dimensioned and where necessary described by explanatory notes They are not to be copied but are intended to serve as a guide to the student when making his own drawings for which directions are given in the form of problems In each section there are many more problems than any one student can work in the amount of time which is usually allotted to the subject of mechanical drawing and a judicious selection must necessarily be made by the teacher to meet the individual students requirement These problems are arranged in the order of their difficulty The problems given in the beginning of each section are not too difficult for a beginner in mechanical drawing while those toward the end of the sections will be found suitable for advanced students Each section begins with problems that are suitable for Junior High Schools High Schools and Evening Schools and advances gradually to problems that are more difficult of solution suitable for Vocational Schools Trade Schools and Colleges About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
