**K-12 Education: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources, 2013-09-30 Primary and Secondary education is a formative time for young students. Lessons learned before the rigors of higher education help to inform learners' future successes and the increasing prevalence of learning tools and technologies can both help and hinder students in their endeavors. K-12 Education: Concepts, Methodologies, Tools, and Applications investigates the latest advances in online and mobile learning as well as pedagogies and ontologies influenced by current developments in information and communication technologies enabling teachers, students, and administrators to make the most of their educational experience. This multivolume work presents all stakeholders in K-12 education with the tools necessary to facilitate the next generation of student-teacher interaction. *A Microcontroller-based Microbox* David J. **Protection of Wind Turbine Generators Using Microcontroller-Based Applications** Nagwa F. Ibrahim, Sobhy S. Dessouky, Hossam E. Mostafa Attia, Ali H. Kasem Alaboudy, 2022-02-08 Protection of Wind Turbine Generators Using Microcontroller-Based Applications focuses on the application of microcontrollers in the protection of wind turbine generators. The book looks at the design and implementation of a versatile digital overcurrent (OC), overvoltage (OV), undervoltage (UV), overfrequency (OF), underfrequency (UF), and negative sequence relays and addresses the dynamic behaviour of a wind-driven induction generator (IG) connected to a power system grid through a transmission line. The transient responses of protective devices associated with the IG are also studied. Modelling of the digital relay for wind turbine generator protection using MATLAB Simulink considers most of the aerodynamic and mechanical effects that can influence instantaneous output voltage, current, and power. Coverage also includes different AC fault types, a detailed theoretical analysis of fault and protection strategy in AC fault, and the different types of fault detection algorithms to maintain power system reliability.

**An Intel 80C196KB Microcontroller Based Implementation of the MVVS Algorithm for the Cornell Electric Vehicle** William Dill, 1993 Advances in Systems, Computing Sciences and Software Engineering Tarek Sobh, Khaled Elleithy, 2007-09-27 Advances in Systems, Computing Sciences and Software Engineering This book includes the proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS 05). The proceedings are a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of computer science, software engineering, computer engineering, systems sciences, and engineering information technology, parallel and distributed computing, and web-based programming. SCSS 05 was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering (CISSE 05) [www.cisse2005.org](http://www.cisse2005.org). The World's first Engineering, Computing, and Systems Research Conference (CISSE 05) was the first high-caliber Research Conference in the world to be completely conducted online in real time via the internet. CISSE 05 received 255 research paper submissions and the final program included 140

accepted papers from more than 45 countries The concept and format of CISSE 05 were very exciting and ground breaking The PowerPoint presentations final paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants so they could choose the presentations they want to attend and think about questions that they might want to ask The live audio presentations were also recorded and were part of the permanent CISSE archive which also included all power point presentations and papers SCSS 05 provided a virtual forum for presentation and discussion of the state of the art research on Systems Computing Sciences and Software Engineering
