3. The major steps followed during a scientific inquiry are: making observations, asking questions, forming a hypothesis, making a prediction, performing an experiment/investigation, analyzing data, drawing a conclusion, and supporting or rejecting/revising the hypothesis.
4. a
5. a. Repeat the experiment several times.
b. Revise your hypothesis.
6. c
7. c
8. a
9. a true; b true; c false; Meiosis leads to four genetically different daughter cells. d false; Meiosis is important for generating genetic variation among the daughter cells and each cell will have half the number of chromosomes. e true
10. c
11. c
12. The original source of all new alleles is genetic mutation.
13. b
14. Black with a long tail
15. Because the allele for dimples is dominant, a dimpled adult may be heterozygous—carrying the non-dimpled allele. If both parents carry the recessive allele, they have a 25% chance of having a child with no dimples.

16. Comparison of Genotype and Phenotype

Term	Description	Example
Genotype	The combination of alleles in an individual organism	The combination of alleles for any given trait, such as Ss or AaBb
Phenotype	The outward expression of an organism's genotype; an organism's phenotype is its physical and physiological traits	A physical characteristic, such as pea shape; a physiological characteristic, such as sickle cell anemia; or a behavioural characteristic, such as territorial behaviour

17. Mendel's discovery of the allele is so important because the laws that Mendel developed through his work on pea plants formed the foundations of our modern theory of inheritance and his discovery explained the mechanism underlying evolution and natural selection.
18. c

Sensemaking in Elementary Science Elizabeth A. Davis, Carla Zembal-Saul, Sylvie M. Kademian, 2019-10-16. Grounded in empirical research, this book offers concrete pathways to direct attention towards elementary science teaching that privileges sensemaking rather than isolated activities and vocabulary. Outlining a clear vision for this shift using research-backed tools, pedagogies and practices to support teacher learning and development, this edited volume reveals how teachers can best engage in teaching that supports meaningful learning and understanding in elementary science classrooms. Divided into three sections, this book demonstrates the skills, knowledge bases and research-driven practices necessary to make a fundamental shift towards a focus on students' ideas and reasoning and covers topics such as: An introduction to sensemaking in elementary science; Positioning students at the center of sensemaking; Planning and enacting investigation-based science discussions; Designing a practice-based elementary teacher education program; Reflections on science teacher education and professional development for reform-based elementary

science In line with current reform efforts including the Next Generation Science Standards NGSS Sensemaking in Elementary Science is the perfect resource for graduate students and researchers in science education elementary education teacher education and STEM education looking to explore effective practice approaches and development within the elementary science classroom
