Planning Support Systems in Practice Stan Geertman, John Stillwell, 2012-11-02 Planning Support Systems Technologies that are Driving Planning Michael Batty Centre for Advanced Spatial Analysis CASA University College London 1 19 Torrington Place London WC 1 E 6BT United Kingdom I had always thought the term Planning Support Systems abbreviated to PSS had been coined by the father of land use modelling Britton Harris in his article Beyond Geographic Information Systems computers and the planning professional published in the Journal of the American Planning Association in 1989 Harris 1989 Until I asked him that is In a response to a paper he gave to the Urban and Regional Information Systems Association URISA in the summer of 1987 he told me that someone in the audience who he cannot quite remember actually coined the term referring to planning support systems as that constellation of digital techniques such as GIS which were emerging to support the planning process In fact the predecessor term decision support systems DSS from which this unknown originator obviously defined PSS by analogy was coined as far back as the late 1970s in the management literature for a loose assemblage of techniques usually computer based which aided management decisions The term slowly entered the geographical lexicon as spatial decision support systems SDSS and this is probably first attributable to Lew Hopkins and Mark Armstrong who used it in a paper published in *AutoCarto 7* in 1985 Hopkins and Armstrong 1985 *Conference Record of POPL '98* Association for Computing Machinery, 1998 *Held Captive by Gas* Joshua Posaner, 2019-08-22 Gas makes or breaks economies as shown by the effects of the 2009 Ukraine Russia gas supply crisis Joshua Posaner looks at four case study countries in Central and Eastern Europe He examines the interdependence between the domestic political structure of a gas import dependent country and the price it paid for imports up to 2014 using the level of reliance on the dominant supplier as an indicator The more dependent a country is on a single supplier the more it pays for its supplies The author aims to explain why capitals prioritize energy security and balance their import portfolios differently while taking a new angle on the European gas system He offers a timely investigation into an oft reported subject with Russia's perceived energy weapon and themes of energy dependence weighing heavily on European political discourse *Report AM-R*, 1984

Environmental Planning in the Netherlands: Too Good to be True Gert de Roo, 2017-03-02 The Netherlands is one of the most prominent and innovative countries in the field of environmental planning Over the past decade its government has introduced such ground breaking schemes as Integrated Environmental Zoning the City Environment Project the Bubble Concept and Policy Concepts and new approaches to coping with noise

odours soil pollution air pollution and safety issues These initiatives and policy tools reflect a rapidly changing and decentralising environmental policy which contrasts with more conventional environmental ideologies However at present little is known of these policies in the international arena De Roo shows how and why in recent years the country's planning system has moved away from its traditional top down structure The resulting changes have had far reaching consequences for the traditional principles of Dutch environmental policy In addition measures for compensating excessive environmental loads are now open to discussion and environmental quality is a subject of negotiation among stakeholders All these developments mean that environmental policy making has become more closely integrated with local initiatives that focus on general location specific qualities In this book this development is referred to as tailor made comprehensive planning which relates closely to the local context is area specific situation dependent and embraces shared governance *Better Regulation in Europe: Netherlands 2010* OECD,2010-03-26 This report maps and analyses the core issues which together make up effective regulatory management for the Netherlands laying down a framework of what should be driving regulatory policy and reform in the future

The EU in a Globalized World Thomas Hoerber,Alexandre Bohas,Stefano Valdemarin,2023-12-11 This book fosters critical reflection on Europe's place in a fast changing global environment covering the soft and hard facets of EU power along the spectrum of low politics high politics Taking an innovative case study approach it provides a wide understanding of European Studies and International Relations beyond classical power considerations and addresses the crossroads of the two disciplines Fundamentally it addresses the specificity of the EU as an actor in International Relations and shows that the EU holds power and influence creating opportunities for peace making and peace building in a way classical IR theory would suggest it should not This book will be of key interest to scholars and students of European Studies foreign policy analysis International Relations Security Studies Political Science History and Economics

The Development of European Gas Markets Javier Estrada,Arild Moe,Kåre Dahl Martinsen,1996-05-01 This volume studies the driving forces behind the development of the European gas market and the uncertainties facing the industry in Europe There is widespread consensus within Europe about the advantages of natural gas to reduce air pollution and to enhance energy supply diversification Thus taking into account these most fundamental prerequisites for increased gas demand this volume addresses the more immediate question of how the conglomeration and organisation of European gas industries will be influenced by this latent demand potential The purpose of this book is to focus both on the analysis of evolutionary organisational processes within the gas industry and the pressures for change provoked by external forces such as interfuel competition environmental imperatives and new trends in European economic policies The potential for structural change in the organisation of the European gas industry is discussed as well as the political economic and commercial factors affecting its progress With the present uncertainty as to whether the gas industry will take advantage of the obvious market opportunities that are opening up this book takes a close

look at the European gas industry at this time of change and analyses how this process may develop and the possible implications this will have on the gas industry **New Method for Determining Heats of Combustion of Gaseous Hydrocarbons** Jag J. Singh,1985 OECD Public Governance Reviews Anticipatory Innovation Governance Model in Finland Towards a New Way of Governing OECD,2022-10-06 This report examined how Finland has been incorporating anticipatory functions within its governance system to deal with complex and future challenges in a systemic way The report applies a new model of anticipatory innovation governance AIG developed by the OECD addressing a considerable gap in prior knowledge and guidance on how governments prepare for unknowable futures
