

File bits

Tapered bit with rounded barrel can be used for safe bevelling at the cuticle area, nail prep work and shaping the entire nail.

Cone is a slim, longer tapered bit, used under the nails as well as at the cuticle or sidewalls. Good for use on top of the toenails because of its slim size.

Tapered barrel is a cone with a flat top. Good for under the nails and on the top surface, however keep away from the cuticle area.

UNC are used to gently bevel the undersides of the nails without cutting the fingertip.

Small and large barrel bits are used for surface work, shortening and backfill cutting. The only difference is the size of the circumference of the bit and preference of the nail technician.
