Hattie Visible Learning Summary:

Visible Learning: The Sequel John Hattie, 2023-03-20 When the original Visible Learning was published in 2008 it instantly became a publishing sensation Interest in the book was unparalleled it sold out in days and was described by the TES as revealing teaching's Holy Grail Now John Hattie returns to this ground breaking work The research underlying this book is now informed by more than 2 100 meta analyses more than double that of the original drawn from more than 130 000 studies and has involved more than 400 million students from all around the world But this is more than just a new edition This book is a sequel that highlights the major story taking in the big picture to reflect on the implementation in schools of Visible Learning how it has been understood and at times misunderstood and what future directions research should take Visible Learning The Sequel reiterates the author's desire to move beyond claiming what works to what works best by asking crucial questions such as Why is the current grammar of schooling so embedded in so many classrooms and can we improve it Why is the learning curve for teachers after the first few years so flat How can we develop teacher mind frames to focus more on learning and listening How can we incorporate research evidence as part of the discussions within schools Areas covered include The evidence base and reactions to Visible Learning The Visible Learning model The intentional alignment of learning and teaching strategies The influence of home students teachers classrooms schools learning and curriculum on achievement The impact of technology Building upon the success of the original this highly anticipated sequel expands Hattie's model of teaching and learning based on evidence of impact and is essential reading for anyone involved in the field of education either as a researcher teacher student school leader teacher trainer or policy maker **The (Practically)**

Collins, 2014-03-04 With the Common Core

poised to markedly amplify the accountability stakes in public education the pressure to post steep outcomes gains has never been fiercer Unsurprisingly flashy and expensive school improvement initiatives that promise quick fix solutions have become pervasively en vogue across the K 12 landscape As Justin A Collins compellingly demonstrates in Burning Cash these flashy acronym reform plans provide for abundantly vivid theatre but offer no muscle for the heavy lifting required to transform instructional quality Collins pens a forceful case that despite the dizzying change swirling around the classroom walls student engagement remains a fixture of a paramount importance Taking a decided detour from the student engagement literature to date Burning Cash spells out an entirely fresh means of numerically charting student engagement levels across all

classrooms over time Were the status quo to instead persist a high school diploma will remain the end of the educational line for millions of schoolchildren By reliably quantifying the nature of student engagement at the classroom level teachers and administrators are supplied a powerfully telling barometer by which to gauge educational quality Also left at educational leaders disposal are data informed guideposts that illuminate the improvement work left to be done As Los Angeles Schools John Deasy champions in the book s foreword when student higher order thinking balloons and disengagement is eradicated test score spikes are extreme and sustained no matter the school district s zip code And that means the promise of the American dream is enlivened without additionally burdening deficit riddled budgets

Achievement Teams Steve Ventura, Michelle Ventura, 2022-05-27 What if you had a collaborative process of looking at student data that could pinpoint student gaps in learning and suggest effective strategies to close those gaps? What if you knew not only what you should start doing to enhance student learning but also what you should stop doing because it hasn't given you the hoped-for results? Enter *Achievement Teams*. This is not another program that's here today and gone tomorrow; it's a timeless approach that any school or district can replicate that focuses on the most significant variable in student achievement: teaching. In *Achievement Teams*, Steve Ventura and Michelle Ventura offer a framework based on John Hattie's *Visible Learning* research that makes teacher collaboration more efficient, rigorous, satisfying and effective. Think of it as a systematic treasure hunt for best practices using real data on your students. The authors walk you through the *Achievement Teams* four-step meeting protocol. In Step 1, teams focus on the evidence from a pre-assessment to provide specific feedback to students and teachers about concepts and skills that students did and did not learn. In Step 2, teams use that evidence to establish SMART goals for both teachers and students. In Step 3, teams summarize the collected data and make inferences around students' mastery levels. In Step 4, teachers select high-impact strategies directly targeted to student needs. A post-assessment reveals what did and didn't work. The authors provide a plethora of resources along the way, including reflection activities to extend your thinking and a variety of helpful downloadable templates designed to facilitate the work. If you're a teacher or leader who is interested in maximizing student achievement, this book is for you.

performance effective leadership can be truly transformational Leadership cannot be taught it has to be learnt It could be argued that school leadership is primarily concerned with learning the leader's own and facilitating that of the children Questioning interrogating and analysing ideas and practice are fundamental to that learning process Libby Nicholas and John West Burnham prompt leaders to do just that Suitable for school leaders at all levels head teachers principals assistant and deputy heads middle leaders aspiring to senior roles and in all educational settings The book will also be of interest to education system leaders chief education officers and directors of education and indeed anyone concerned with developing effective school leadership for example governors and trustees CPD trainers coaches and mentors **Making Classrooms**
