said about the criteria to be used in dividing the system into modules This paper will discuss that issue and by means of examples suggest some criteria which can be used in decomposing a system into modules A Brief Status Report The major advancement in the area of modular programming has been the development of coding techniques and assemblers which 1 allow one module to be written with little knowledge of the code in another module and 2 allow modules to be reassembled and replaced without reassembly of the whole system **Nuclear Science Abstracts** ,1973 Highway Safety Literature ,1979 *Hearings, Reports and Prints of the House Committee on Science and Astronautics* United States.
