Measuring Scholarly Impact Methods And Practice:

Measuring Scholarly Impact Ying Ding, Ronald Rousseau, Dietmar Wolfram, 2014-11-30 Measuring Scholarly Impact Ying Ding, Ronald Rousseau, Dietmar Wolfram, 2014-11-06 This book is an authoritative handbook of current topics technologies and methodological approaches that may be used for the study of scholarly impact The included methods cover a range of fields such as statistical sciences scientific visualization network analysis text mining and information retrieval The techniques and tools enable researchers to investigate metric phenomena and to assess scholarly impact in new ways Each chapter offers an introduction to the selected topic and outlines how the topic technology or methodological approach may be applied to metrics related research Comprehensive and up to date *Measuring Scholarly Impact Methods and Practice* is designed for researchers and scholars interested in informetrics scientometrics and text mining The hands on perspective is also beneficial to advanced level students in fields from computer science and statistics to information science *Science Dynamics and Research Production* Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative

Digital Therapies in Psychosocial Rehabilitation and Mental Health Marques, António,Queirós, Ricardo,2021-12-10 Digital health is the convergence of digital technologies with health to enhance the efficiency of

healthcare delivery and make healthcare more personalized and precise. These technologies generally focus on the development of interconnected health systems to improve the use of computational technologies, smart devices, computational analysis techniques, and communication media to help healthcare professionals and their patients manage illnesses and health risks as well as promote health and well-being. Digital tools play a central role in the most promising future healthcare innovations and create tremendous opportunities for a more integrated and value-based system along with a stronger focus on patient outcomes and, as such, having access to the latest research findings and progressions is of paramount importance.

Digital Therapies in Psychosocial Rehabilitation and Mental Health introduces the latest digital innovations in the mental health field and points out new ways it can be used in patient care while also delving into some of the limits of its application. It presents a comprehensive state-of-the-art approach to digital mental health technologies and practices within the broad confines of psychosocial and mental health practices and also provides a canvas to discuss emerging digital mental health solutions propelled by the ubiquitous availability of personalized devices and affordable wearable sensors and innovative technologies such as virtual and augmented reality, mobile apps, robots, and intelligent platforms. It is ideal for medical professors and students, researchers, practitioners of healthcare companies, managers, and other professionals where digital health technologies can be used.

The mindsponge and BMF analytics for innovative thinking in social sciences and humanities Quan-Hoang Vuong, Minh-Hoang Nguyen, Viet-Phuong La, 2022-10-10 Academia is a competitive environment. Early Career Researchers (ECRs) are limited in experience and resources and especially need achievements to secure and expand their careers. To help with these issues, this book offers a new approach for conducting research using the combination of mindsponge, innovative thinking, and Bayesian analytics.

This is not just another analytics book. 1. A new perspective on psychological processes: Mindsponge is a novel approach for examining the human mind's information processing mechanism. This conceptual framework is used to construct models in studies. The framework is highly flexible and widely applicable for many different types of information processes. The mindsponge approach can help researchers discover interesting ideas or even formulate their very own theories when investigating psychosocial phenomena. This approach brings a fresh wind to the current landscape of social sciences and humanities.

SSH 2. Easy to follow analysis protocol: The Bayesian Mindsponge Framework (BMF) analytics is useful in terms of computing and visualizing power but also easy to learn and apply. Contrary to being intimidating, the Bayesian analytics section of this book is presented in a reader-friendly manner with a detailed yet clear step-by-step procedure. Examples are from published BMF articles, allowing readers to immediately practice the method and quickly create their own applications. With educational purposes in mind, the book is very suitable for ECRs who are looking to innovate their research methods.

3. Advocating for low-cost, high-quality research: Doing science can be very costly. Mindsponge, innovative thinking, and BMF analytics help produce impactful studies using openly available data on online repositories. This is based on the authors' previous works and experiences. The book presents examples of employing

the open R package bayesvl on secondary data from different sources With less financial constraints researchers can have more freedom of thought to pursue their curiosity and creativity ECRs in low and middle income countries may find this aspect crucial in their careers 4 Support and collaboration The authors share their insights from experiences in the academic publishing system to help readers get through the processes of manuscript writing and peer reviewing more easily The authors are also ready to support other researchers with further inquiries and collaboration opportunities at the following website <https://mindsponge.info> This book is for a ECRs whose only abundant resources are their innovation capacity and strength of will b Researchers in SSH who want to explore a novel approach to thinking and study conducting c Low and middle income countries researchers looking for a cost effective research protocol and d Innovative thinkers who want to turn their interesting thoughts into good publications
