*This will need to be changed later as given. See below for corrections.

These many thoughtful and judicious contributions are a credit to the power of consensus. This thoughtful, well-thought-out book should stimulate and extend the debate. Each procedure varies in length; some last approximately 30 minutes, while others may take hours.

Lidocaine, which is a numbing medication, is given for all procedures. It stuns and stings for a few seconds while injected. After the lidocaine is given, you should not feel any pain. Let the doctor know right away if you do. You do not "go to sleep" for these procedures.

You will be required to lay flat on the x-ray table for the procedure. It is very important that you remain still for your procedure. This is for your safety and will allow the procedure to progress quickly.

A. Pfenkman, Registered Nurse and Radiologic Technologist, is present for each research day.

A specially trained and Board Certified Physician (radiologist) will interpret your images and send a report to your doctor that confirms this procedure.

If the song remains your best, you need musical advice now. Contact us for this, personally, please, and let the physician who conducted your performance see the best musical performance you can.

If you received contrast during your procedure, you will be encouraged to drink a lot of water over the next 48 hours to help flush the contrast out of your system.

Your doctor that ordered your procedure will receive a detailed report.
