The Semantics of English Prepositions Andrea Tyler,Vyvyan Evans,2003-06-05 Using a cognitive linguistics perspective this book provides a comprehensive theoretical analysis of the semantics of English prepositions All English prepositions originally coded spatial relations between two physical entities while retaining their original meaning prepositions have also developed a rich set of non spatial meanings In this study Tyler and Evans argue that all these meanings are systematically grounded in the nature of human spatio physical experience The original spatial scenes provide the foundation for the extension of meaning from the spatial to the more abstract This analysis articulates an alternative methodology that distinguishes between a conventional meaning and an interpretation produced for understanding the preposition in context as well as establishing which of several competing senses should be taken as the primary sense Together the methodology and framework are sufficiently articulated to generate testable predictions and allow the analysis to be applied to additional prepositions

Williams Syndrome across Languages Susanne Bartke,Julia Siegmüller,2004-06-22 Williams Syndrome WS aka Williams Beuren Syndrome is a developmental disorder that we have known about for some forty years The cause for WS was detected only recently a micro deletion on chromosome 7 more specifically at the region of chromosome 7q11.23 The cognitive and behavioral profile in WS is characterized by a marked discrepancy between verbal and non verbal skills combined with relatively spared linguistic skills Recent research has shown

considerable progress defining the areas of intactness in linguistic abilities This volume builds on that research giving an overview of the psycholinguistic research undertaken and opening up new perspectives and insights through new data and analyses This book is of interest to researchers of applied cognitive science and to linguists more occupied with theoretical research *International Journal of Language Studies (IJLS) - volume 7(1)* Mohammad Ali Salmani Nodoushan, 2012-11-18 Papers in this issue by James Dean BROWN 1 32 Peter MASTER 33 58 Glenn S HADIKIN 59 78 Mohammad Ali SALMANI NODOUSHAN 79 102 Noparat TANANURAKSAKUL 103 116 Jonathan Rante CARREON Eliza C ANDERSON Aaron M VANDERHOFF Stephen Pax LEONARD 151 174 Azizeh CHALAK Hossein HEIDARI TABRIZI 175 184 *Language Competence Across Populations* Yonata Levy, Jeannette C. Schaeffer, 2003-01-30 This unique edited book bridges studies in language disorders and linguistic theory with timely contributions from leading scholars in language development It presents an attempt to define Specific Language Impairment relating it to children of normal and disordered language capabilities The chapter presentations examine language development across a variety of populations of children from those with Specific Language Impairment to second language learners The contributors discuss criteria for the definition of SLI compare and contrast SLI with profiles of children with other disorders and dialects and offer a comprehensive look at the Whole Human Language which ties together spoken and signed languages Methodological concerns that affect the credibility and generalizability of the findings are discussed and controversies between opposing linguistic approaches to language acquisition are presented The conceptual thread that gradually reveals itself as the chapters unfold is a theoretical issue of central importance to cognitive theory as well as to our understanding of the biological correlates of language it concerns the variability that linguistic competence can manifest in children under different biological conditions and life circumstances *Language Competence Across Populations Toward a Definition of Specific Language Impairment* is an essential volume for advanced students and scholars in linguistics and psychology who have an interest in language acquisition and language disorders as well as for the clinical professionals dealing with children with language impairments **Corpus, Cognition and Causative Constructions** Gaëtanelle Gilquin, 2010-03-24 English causative constructions with cause get have and make are often mistakenly presented as quasi synonymous and more or less interchangeable This book demonstrates the value of corpus linguistics in identifying the syntactic semantic lexical and stylistic features that are distinctive for each of these constructions It also underlines the usefulness of providing corpus studies with a solid theoretical foundation by showing how corpus linguistics can be fruitfully combined with cognitive linguistics which is used both as a starting point for the analysis top down approach and as a framework within which to interpret the corpus results bottom up approach From a methodological point of view the study illustrates the complementarity of corpus and elicitation data and offers tools and methods that could be used to investigate other syntactic structures Finally the book also has a pedagogical dimension in that it examines how the research findings can be applied to foreign language teaching **Creat Tuntas Kuasai Bahasa**
