Carroll Gantz,2012-10-05 House cleaning has been an innate human activity forever but only since the early 19th century  
have mechanical devices replaced the physical labor performed mostly by women Mechanical carpet sweepers were replaced  
by manual suction cleaners which in turn were replaced by electric vacuum cleaners in the early 20th century Innovative  
inventors who improved vacuum cleaners as electricity became commonly available made these advances possible Many  
early manufacturers failed but some such as Bissell Hoover Eureka and others became household names as they competed  
for global dominance with improved features performance and appearance This book describes the fascinating people who  
made this possible as well as the economic cultural and technological contexts of their times From obscure beginnings 200
