promoted and enabled new kinds of storytelling computers work as enablers of games letting us play old games in new ways and allowing for new kinds of games that would not have been possible before computers Juul presents a classic game model which describes the traditional construction of games and points to possible future developments He examines how rules provide challenges learning and enjoyment for players and how a game cues the player into imagining its fictional world Juul s lively style and eclectic deployment of sources will make *Half Real* of interest to media literature and game scholars as well as to game professionals and gamers
