Essays On Planning Theory And Education A Faludi:

Essays on Planning Theory and Education A. Faludi, 2013-10-22 A selection of essays concerned with the evolution of thought in the fields of both planning theory and education A joint treatment of these closely related themes adds to the understanding of planning theory as a conceptual basis for planning and aims to engender discussion of improvements to the education of planners

Essays on Planning Theory and Education Andreas Faludi, 1976

Planning Theory Franco Archibugi, 2008-01-29 Planning Theory expresses a sound unease about the direction taken by the current analysis and criticism of planning experiences both in the field of economics and in urban and regional planning Instead of seriously revising the technical and scientific shortcomings marking the various problems encountered in the planning experience in both fields academic debates and reflection have instead led to a kind of political interpretation On the basis of the hopelessness of improving the governance of managerial and political planning initiatives planning theory has been reduced to a generic sociological debate on planning itself a debate that freezes planning as a permanently declining engagement To oppose this the present book aims to identify the essential guidelines of a re launch of planning processes and techniques configuring a kind of neo discipline called planology by the author which builds upon a multi disciplinary integration never seen and experimented with until now of economic environmental and sociological approaches a crucial element missing in previous unsuccessful planning attempts

Critical Readings in Planning Theory Chris Paris, 2013-10-22 Urban and Regional Planning Series Volume 27 Critical Readings in Planning Theory presents a critical perspective on urban and regional planning This book provides an understanding of various theoretical perspectives on planning Organized into five parts encompassing 19 chapters this volume begins with an overview of the economic and social theory of planning This text then examines the procedural planning theory which deals with the making and implementing of plans Other chapters consider the introduction of the systems approach to planning This book discusses as well the theoretical respecification of the nature of town planning as it has developed under capitalism The final chapter deals with the ideology of planning that is consistent with the view that town planning can be objectively useful This book is a valuable resource for students of planning who want to understand planning as it is Urban planners and engineers will also find this book useful

The Programming Approach and the Demise of Economics Franco Archibugi, 2019-11-21 This trilogy deals with an epistemology of economics arguing for a radical overturning of conventional analysis and providing an alternative to political economy and social sciences based not on positivism but on a normative and programming paradigm Volume II builds on the work presented in Volume I to explore oppositions to the traditional and conventional teaching of economics and presents testimonies that are favourable to a trend towards a programming approach thereby giving substance to the epistemological overturning of conventional analysis Such oppositions studied include the work of Ludvig von Mises and his theory of praxeology Ian Tinbergen and Wassily Leontief's preference for planning over forecasting science Bruno de Finetti and Daniel

Bell's support for the base of utopia in economics the trend from the theory of planning towards the methodology of planning by Andreas Faludi neoclassic curiosity about the multi purposes approach and non economic commodities as investigated by Walter Isard as well as theories expressed by Herbert Simon Robert Lucas George Soros and Mark Blaug Volume III takes studies further and presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch's plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences *Teaching, Learning & Researching* Roberto Rocco, Gregory Bracken, Caroline

Newton, Marcin Dabrowski, 2022-09-22 This book is composed of a general introduction followed by 18 chapters written by teachers and researchers from TU Delft as well as frequent collaborators each describing an issue or tool used in Spatial Planning as it is taught and researched at our university The book aims to give readers around the world an introduction to how spatial planning is conceived at TU Delft Spatial planning is a highly idiosyncratic discipline and is conceived differently around the world In most places spatial planning is part of an architectural approach to the city in which design exists almost autonomously while in other places it is part of a political economical approach to the city What distinguishes Delft is the bridge we have managed to build between design and politics and the way we understand space as foundational for the understanding of socio economic processes This is anchored on a Dutch tradition of city making in which issues of *maakbaarheid* roughly translated by feasibility a guiding concept in Dutch society which was built upon an exceedingly difficult territory to plan design and manage Spatial planning in the Netherlands is hence a combination of planning design and management that is unique Simultaneously spatial planning as a discipline in the Netherlands is rather forward thinking and uniquely equipped to deal with the great societal challenges of our time climate change pandemics growing inequality etc and may be useful for students and teachers elsewhere seeking to learn from other traditions Each chapter addresses issues that we see as central to the way of teaching and researching spatial planning Energy Policy and Land-Use Planning

D. R. Cope, P. Hills, P. James, 2013-10-22 This book fills a gap in the available literature on energy policy by dealing with the relationship between energy and land use planning It considers in a systematic way energy developments in national regional and local planning policy contexts concentrating particularly on energy supply issues in Europe **Planning**

Theory Patsy Healey, Glen McDougall, Michael J. Thomas, 1982 Alternative Planning History and Theory Dorina Pojani, 2022-12-27 This book includes twelve newly commissioned and carefully curated chapters each of which presents an alternative planning history and theory written from the perspective of groups that have been historically marginalized or neglected In teaching planning history and theory many planning programs tend to follow the planning cannon a normative perspective that mostly accounts for the experience of white Anglo Christian middle class middle aged heterosexual able bodied men This book takes a unique approach It provides alternative planning history and theory timelines for each of the following groups women the poor LGBTQ communities people with disabilities older adults children religious minorities

people of color migrants Indigenous people and colonized peoples in South Asia and Sub Saharan Anglophone Africa To allow for easy cross comparison chapters follow a similar chronological structure which extends from the late 19th century into the present The authors provide insights into the core planning issues in each time period and review the different stances and critiques The book is a must read for planning students and instructors Each chapter includes the following pedagogical features 1 a boxed case study which presents a recent example of positive change to showcase theory in practice 2 a table which lays out an alternative planning history and theory timeline for the group covered in the chapter and 3 suggestions for further study comprising non academic sources such as books websites and films

Planning for the Common Good

Mick Lennon, 2021-12-30 Appeals to the common good or public interest have long been used to justify planning as an activity While often criticised such appeals endure in spirit if not in name as practitioners and theorists seek ways to ensure that planning operates as an ethically attuned pursuit Yet this leaves us with the unavoidable question as to how an ethically sensitive common good should be understood In response this book proposes that the common good should not be conceived as something pre existing and out there to be identified and applied or something simply produced through the correct configuration of democracy Instead it is contended that the common good must be perceived as something in here which is known by engagement with the complexities of a context through employing the interpretive tools supplied to one by the moral dimensions of the life in which one is inevitably embedded This book brings into conversation a series of thinkers not normally mobilised in planning theory including Paul Ricoeur Alasdair MacIntyre and Charles Taylor These shine light on how the values carried by the planner are shaped through both their relationships with others and their relationship with the tradition of planning a tradition it is argued that extends as a form of reflective deliberation across time and space It is contended that the mutually constitutive relationship that gives planning its *raison d'être* and the common good its meaning are conceived through a narrative understanding extending through time that contours the moral subject of planning as it simultaneously profiles the ethical orientation of the discipline This book provides a new perspective on how we can come to better understand what planning entails and how this dialectically relates to the concept of the common good In both its aim and approach this book provides an original contribution to planning theory that reconceives why it is we do what we do and how we envisage what should be done differently It will be of interest to scholars students and practitioners in planning urban studies sociology and geography
