Guideline Cdm Vunfccc:

Operational guidelines for the design, implementation and harmonization of monitoring and evaluation systems for climate-smart agriculture Food and Agriculture Organization of the United Nations, 2019-09-24 Monitoring and evaluation M E is recognized as critically important for tracking progress whether it serves the purpose of accountability to donors informs future improvements to CSA practices or contributes to the aggregate global progress toward meeting the SDGs or the global stocktake under the Paris Agreement There has been a growing chorus acknowledging the need to align the indicators and M E frameworks of major donors with those of the three global agreements Monitoring and reporting has begun on the SDGs although the development of methodologies for various indicators is an evolving process The development of specific indicators for the agriculture sector is also well underway for the Sendai Framework The organizations conducting this work have recognized the need to streamline these processes For example they have already attempted to align several of the indicators between the SDGs and the Sendai Framework These operational guidelines aim to address the core constraints and needs of FAO Member States on both the design and implementation of M E systems that can simultaneously address CSA and sector reporting requirements for the 2030 Agenda the Sendai Framework and the UNFCCC Paris Agreement First and foremost the guidelines acknowledge the principal need expressed by Member States that M E systems and indicators be simple and not onerous The challenges that have always existed with regard to M E for CSA are still present and are particularly pronounced for pillar 2 adaptation and resilience These challenges to the development of indicators for pillar 2 have exhibited the greatest need for attention Handbook on Energy Audit and Environment Management Y. P. Abbi, Shashank Jain, 2006-01-01 Released on 24 Aug 2006 by Shri Sushil Kumar Shinde Hon ble Union Minister of Power Govt of India the handbook presents a detailed account of energy conservation and environmental management in small medium as well as large enterprises It is a must read for every professional interested in energy management and auditing *GUIDELINES TO CLEAN ENERGY* S Batchelor, N Scott, J McAllister, 2017-06-30 This manual has been designed for use by city officials and planners working in sub Saharan Africa It is a practical handbook which identifies easy to achieve energy interventions that will save money for cities businesses and households promote local economic development and enhance the sustainable profile of a city This manual is specifically aimed as a support tool to achieve the implementation of key interventions within municipalities across sub Saharan Africa Guidelines for Estimating Greenhouse Gas Emissions of ADB Projects Asian Development Bank, 2017-04-01 Developing Asia has the world's fastest growing rate of greenhouse gas emissions with the leading driver being emissions from power generation Reducing these emissions is paramount to ensuring a sustainable future while responding to the threat of climate change This publication provides Asian Development Bank energy sector staff consultants and other interested readers with an understanding of key concepts and principles for estimating and reporting on the climate change impacts of energy projects

These guidelines provide more detail on estimating the emissions reductions attributable to energy efficiency and renewable energy projects

Economics and Management of Climate Change Bernd Hansjürgens, Ralf Antes, 2008-07-01 Climate change is one of the biggest challenges for mankind. Although there is increasing evidence that climate change is already occurring, there is neither sufficient knowledge as to what extent climate change poses risks to societies and companies nor about adequate strategies to cope with these risks. Bringing together an international group of scholars from environmental economics, political science, and business, this book describes analyses and evaluates climate change risks and responses of societies and companies. The book contributes to the question of how climate change can be mitigated by discussing efficient and effective design of mitigation measures in particular emissions trading and clean development mechanism (CDM). Placing special emphasis on the impact of climate change risks on business, the book investigates in which way selected sectors of the economy are affected and what measures they can undertake to adapt to climate change risks.

Handbook of Carbon Offset Programs Anja Kollmuss, Michael Lazarus, Carrie Lee, Maurice LeFranc, Clifford Polycarp, 2010-08-12 Greenhouse gas (GHG) offsets have long been promoted as an important element of a comprehensive climate policy approach. Offset programs can reduce the overall cost of achieving a given emission goal by enabling emission reductions to occur where costs are lower. Offsets have the potential to deliver sustainability co-benefits through technology development and transfer. They can also develop human and institutional capacity for reducing emissions in sectors and locations not included in a cap and trade or a mandatory government policy. However, offsets can pose a risk to the environmental integrity of climate actions, especially if issues surrounding additionality, permanence, leakage, quantification, and verification are not adequately addressed. The challenge is to design offset programs and policies that can maximize their potential benefits while minimizing their potential risks. This handbook provides a systematic and comprehensive review of existing offset programs. It looks at what offsets are, how offset mechanisms function, and the successes and pitfalls they have encountered. Coverage includes offset programs across the full swath of applications, including mandatory and voluntary systems, government-regulated and private markets, carbon offset funds, and accounting and reporting protocols such as the WBCSD WRI GHG Protocol and ISO 14064. Learning from the successes and failures of these programs will be essential to crafting effective climate policy. This is an essential reference for all regulators, policy makers, business leaders, and NGOs concerned with the design and operation of GHG offset programs worldwide. Published with SEI.

The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon, 2024 In *The Political Economy of Climate Finance Effectiveness in Developing Countries*, Mark Purdon contributes to broader debates on international climate cooperation by evaluating how three different climate finance instruments have been undertaken in three countries: Tanzania, Uganda, and Moldova, and

evaluates their effectiveness in actually reducing emissions He shows that the effectiveness of climate finance tools depends on the interaction between a nation s development policy paradigms and its interests in other sectors of their economies Purdon s findings further inform the design of international and transnational efforts to engage developing countries on climate change mitigation by emphasizing the importance of domestic politics and the state

The Human Rights-Based Approach to Carbon Finance Damilola S. Olawuyi,2016-06-09 Outlines a human rights based approach to carbon finance a framework for mainstreaming human rights into carbon project implementation

Environmental Management Accounting Christian Herzig,Tobias Viere,Stefan Schaltegger,Roger L. Burritt,2012-03-15 Sustainable development will not happen without substantial contributions from and leading roles of companies and business organizations This requires the provision of adequate information on corporate social and ecological impacts and performance For the last decade progress has been made in developing and adapting accounting mechanisms to these needs but significant work is still needed to tackle the problems associated with conventional accounting Until recently research on environmental management accounting EMA has concentrated on developed countries and on cost benefit analysis of implementing individual EMA tools Using a comparative case study design this book seeks to redress the balance and improve the understanding of EMA in management decision making in emerging countries focussing specifically on South East Asian companies Drawing on 12 case studies taken from a variety of industries Environmental Management Accounting Case Studies of South East Asian Companies explores the relationship between decision situations and the motivation for and barriers to the application of clusters of EMA tools as well as the implementation process itself This book will be useful to scholars interested in the environmental and sustainability management accounting research field and those considering specific approaches to EMA within emerging economies

Sustainable Treatment and Reuse of Municipal Wastewater Menahem Libhaber,Alvaro Orozco Jaramillo,2012-05-31 In many countries especially in developing countries many people are lacking access to water and sanitation services and this inadequate service is the main cause of diseases in these countries Application of appropriate wastewater treatment technologies which are effective low cost in investment and especially in operation and maintenance simple to operate proven technologies is a key component in any strategy aimed at increasing the coverage of wastewater treatment Sustainable Treatment and Reuse of Municipal Wastewater presents the concepts of appropriate technology for wastewater treatment and the issues of strategy and policy for increasing wastewater treatment coverage The book focuses on the resolution of wastewater treatment and disposal problems in developing countries however the concepts presented are valid and applicable anywhere and plants based on combined unit processes of appropriate technology can also be used

in developed countries and provide to them the benefits described Sustainable Treatment and Reuse of Municipal Wastewater presents the basic engineering design procedures to obtain high quality effluents by treatment plants based on simple low cost and easy to operate processes The main message of the book is the idea of the ability to combine unit processes to create a treatment plant based on a series of appropriate technology processes which jointly can generate any required effluent quality A plant based on a combination of appropriate technology unit processes is still easy to operate and is usually of lower costs than conventional processes in terms of investment and certainly in operation and maintenance Chapters in the book are organized in a practical and accessible way to Demonstrate selected unit process of appropriate technology and provide the scientific basis the equations and the parameters required to design the unit processes with some innovations developed by the authors Highlight design procedures for selected combined processes which are in use in developing countries Propose an innovative Orderly Design Method ODM which is easy to follow by practicing engineers using the equations and formulas developed once the fundamentals of each unit and combined process have been established Provide a numeric example for the basic design of each selected appropriate technology process for a city with a population of 20 000 using the ODM and an Excel program which will be provided to the readers for download from an online web page This book is a valuable and practical resource for all wastewater treatment engineers in field and the operational managers of waste treatment facilities Authors Menahem Libhaber PhD Consulting Engineer to the World Bank and other institutions Alvaro Orozco Jaramillo MSc Consulting Engineer to the World Bank the Inter American Development Bank Biwater and other institutions in various countries The Protection of Indigenous Peoples and Reduction of Forest Carbon Emissions Handa Abidin,2015-07-14 In The Protection of Indigenous Peoples and Reduction of Forest Carbon Emissions Handa Abidin identifies three main approaches that can be used by indigenous peoples to protect their rights in the context of REDD plus Further he discusses how the available protection for indigenous peoples in the context of REDD plus is currently insufficient to quickly address cases where the rights of indigenous peoples have been violated through REDD plus activities Abidin recommends the establishment of a committee and a panel on REDD plus that could convey greater benefits to the context of REDD plus and indigenous peoples as well as to wider contexts such as climate change human rights and international law

Beyond the Carbon Economy Don Zillman,Catherine Redgwell,Yinka Omorogbe,Lila K. Barrera-Hernández,2008-03-06 The present energy economy with its heavy dependence on fossil fuels is not sustainable over the medium to long term for many interconnected reasons Climate change is now recognized as posing a serious threat Energy and resource decisions involving the carbon fuels therefore play a large role in this threat Fossil fuel reserves may also be running short and many of the major reserves are in politically unstable parts of the world Yet citizens in nations with rapidly developing economies aspire to the benefits of the modern energy economy China and India alone have 2 4 billion potential customers for cars industries and electrical services Even so more than half of the world s citizens still lack access to energy Decisions involving

fossil fuels are therefore a significant part of the development equation This volume explains how the law can impede or advance the shift to a world energy picture significantly different from that which exists today It first examines the factors that create the problems of the present carbon economy including environmental concerns and development goals It then provides international and regional legal perspectives examining public international law regional legal structures the responses of international legal bodies and the role of major international nongovernmental actors The book then moves on to explore sectoral perspectives including the variety of renewable energy sources new carbon fuels nuclear power demand controls and energy efficiency Finally the authors examine how particular States are could or should be adapting legally to the challenges of moving beyond the carbon economy

Handbook of Research on Geospatial Science and Technologies Maphanyane, Joyce Gosata, Mapeo, Read Brown Mthanganyika, Akinola, Modupe O., 2017-08-10 The impacts of climate change are beginning to be felt throughout the world yet there is no clear explanation as to how these changes will alter our future The research being conducted within the geospatial science field is pivotal to understanding the effects the global environment is experiencing The Handbook of Research on Geospatial Science and Technologies is an essential scholarly reference source that evaluates the current methodologies and trends in geospatial science and how these insights provide society with more efficient and effective ways to manage natural resources Featuring discussions on relevant topics such as cartography geographical information systems remotely sensed data and sustainability management this publication is an informative resource for all academicians students scientists and researchers that are interested in emerging developments within geospatial science

Legal Aspects of Carbon Trading David Freestone, Charlotte Streck, 2009-10 Since 2005 the carbon market has grown to nearly 100 billion per annum This new book examines all the main legal issues which are raised by this explosion of what is now called carbon finance It covers not only the Kyoto Flexibility Mechanisms but also the EU Emissions Trading Scheme ETS that is in the process of reform and other national and voluntary schemes The Parties to the 1992 UN Framework Convention are in the process of negotiating a successor regime to the 1997 Kyoto Protocol whose commitment period ends in 2012 As scientists predict that the threat of dangerous climate change requires much more radical mitigation actions the negotiations aim for a more comprehensive and wide ranging agreement which includes new players such as the US as well as taking account of new sources such as aircraft emissions and new mechanisms such as Reducing Emissions through Deforestation and Degradation REDD This volume will cover the legal aspects of these This volume builds on the success of the editors previous volume published by OUP in 2005 *Legal Aspects of Implementing the Kyoto Protocol Mechanisms Making Kyoto Work* which remains the standard work of reference for legal practitioners and researchers on carbon finance and trading under the Kyoto Protocol

International Organizations and the Law Alexandra R. Harrington, 2023-12-18 *International Organizations and the Law* addresses the laws relating to international organizations their undertakings and the ways in which specific international organizations function and interact with one

another Assuming little background knowledge of international law the book brings together key issues in international law and the history of international organizations in a cohesive manner providing readers with a clear understanding of international organizations law in context It addresses topics such as organization functions and structure membership and membership powers the rights of international organizations dispute settlement in international organizations termination of an international organization The second edition has been fully revised and updated to include coverage of the COVID 19 pandemic and its impact on the functions of international organizations the invasion of Ukraine and the stresses placed on the UN NATO and the international community increased efforts in the climate change sector and the overhaul of the NAFTA system and the impact of Brexit Written in an accessible and engaging way this book is ideal reading for students new to the law of international organizations and as a reference for those active in fields impacted by international organizations

Crucial Issues in Climate Change and the Kyoto Protocol Kheng Lian Koh, 2010 Crucial Issues in Climate Change and the Kyoto Protocol Asia and the World focuses on responses to climate change in the world's most populous region This book provides the most comprehensive insight to the climate change discourse within Asia to date by drawing on the diverse disciplines and experience of legal practitioners climate change consultants government officials and academics Individual chapters address issues such as how the various Asian countries OCo highly disparate in their cultures socio economic conditions and political systems OCo are responding to climate change the challenges of mitigating and adapting to climate change and the effective implementation of the Kyoto Protocol in Asia Sample Chapter's Foreword 37 KB Chapter 1 Climate Disruption Remaking the Agenda of MEAs in Asia and the World 138 KB Contents Setting the Stage Climate Disruption Remaking the Agenda of MEAs in Asia and the World N A Robinson Reframing Global Warming Toward a Strategic National Planning Framework S V Valentine Climate Change OCo Living in the Anthropocene J Obbard Clean Development Mechanism CDM An Overview of the Clean Development Mechanism in Southeast Asia J Lin CDM in China X Yang Empirical Considerations in the Development of CDM Projects in Asia W I Y Byun Making Markets Work OCo A Review of CDM Performance and the Need for Reform C Streck Emissions Trading in the European Union and Asia Regional Framework The European Union Emissions Trading Scheme OCo Past Present and Future K Deketelaere Trends in Carbon Trading Practical Lessons A Beatty Effective Implementation of the Kyoto in Asia Singapore's National Climate Change Strategy K Suresh Japan Achieving Its Kyoto Target H Isozaki Compliance Under the Kyoto Protocol and Its Implications for the Asian Region M S Manguiat Climate Change as a Threat to Peace The Kyoto Protocol and Beyond A South Asian Perspective A Gunawansa Beyond Kyoto Climate Change Including a Discussion of the AP6 Initiative from the Australian Perspective M I Jeffery Protecting Forests to Mitigate Global Climate Change C Streck Readership Environmental lawyers policy makers practitioners in CDM tertiary students in environmental sciences
