National Aeronautics and Space Administration (NASA), 2018-08-16 A computer program has been written to provide an
interface between the HP Series 200 desktop computers operating under HP Standard Pascal 3 0 and the HP2250 Data
Acquisition and Control System Pascal 3 0 for the HP9000 desktop computer gives a number of procedures for handling bus
communication at various levels It is necessary however to reach the lowest possible level in Pascal to handle the bus
protocols required by the HP2250 This makes programming extremely complex since these protocols are not documented
The program described solves those problems and allows the user to immediately program simply and efficiently any
measurement and control language MCL 50 application with a few procedure calls The complete set of procedures is
available on a 5 1 4 inch diskette from Cosmic Included in this group of procedures is an Exerciser which allows the user to
exercise his HP2250 interactively The exerciser operates in a fashion similar to the Series 200 operating system programs
but is adapted to the requirements of the HP2250 The programs on the diskette and the user s manual assume the user is
acquainted with both the MCL 50 programming language and HP Standard Pascal 3 0 for the HP series 200 desktop
