Embodying Youth Wesley Ellis, Michael Langford, 2020-05-21 Embodying Youth Exploring Youth Ministry and Disability seeks to help close the gap between disability theology and youth ministry education What is youth ministry And who is it for Christian youth workers and ministers in the West have been answering these questions either implicitly or explicitly for decades The ways we answer these questions and the ways in which we go about answering them have huge implications with regards to the faithfulness and effectiveness of the church's ministry with young people These questions have not always been pursued with the experience of disability in mind In fact it is often excluded not only from the academic field but from the church's practice of youth ministry as well In this book scholars and youth workers seek to attend to the questions of youth ministry by putting the experience of disability at the forefront with hope not only that the church might include young people with disabilities but also that our very understanding of what youth ministry is and who youth ministry is for might be transformed for the

States Debt and Power argues for the importance of situating our contextually influenced thinking about European states and debt within a commitment to historically informed and critical analysis. It teases out certain broad historical patterns. The book also examines the inescapably difficult and contentious judgements about bad and good debt about what constitutes sustainable debt and about distributive justice at times of sovereign debt crisis. These judgements offer insight into the nature of power and the contingent nature of sovereign creditworthiness. Three themes weave through the book: the significance of creditor-debtor state relations in defining asymmetry of power; the context-specific and constructed character of debt above all in relation to war and the limitations of formal economic reasoning in the face of radical uncertainty. Part I examines case studies from Ancient Greece to the modern Euro Area and brings together a wealth of historical data that cast fresh light on how sovereign debt problems are debated and addressed. Part II looks at the conditioning and constraining framework of law, culture and ideology and their relationship to the use of policy instruments. Part III shows how the problems of matching the assumption of liability with the exercise of control are rooted in external trade and financial imbalances and external debt in financial markets and vulnerability to banking crisis in the character of the private governance of public debt in who has power over indicators of sustainability in domestic institutional and political arrangements and in sub-national fiscal governance. Part IV looks at how the problems of mismatch between liability and control take on an acute form within the historical context of European monetary union above all in Euro Area debt crises.

Among the emerging topics covered in the handbook are biological functioning, organizational innovation, digital religion, spirituality, atheism and transnationalism. The relationship of religion to other significant social institutions like work and entrepreneurship, science and sport is also analyzed. Specific attention is paid where appropriate to international issues as well as to race, class, sexuality and gender differences. This handbook includes 27 chapters by a distinguished, diverse and international collection of experts organized into 6 major sections: religion and social institutions, religious organization, family life, course and individual change, difference and inequality, political and legal processes and globalization and transnationalism. *Herald and Presbyter*, 1901. Teaching Human Rights in Primary Schools Alison E. C. Struthers, 2019-11-07. Teaching Human Rights in Primary Schools delves into the important issue of Human Rights Education (HRE) implementation, exploring the nature and extent of HRE in education policy and practice in English primary schooling and seeking to understand the reasons for deficiencies in practice in this area. HRE enables people not only to identify rights violations in their own lives but

also equips them with the knowledge values and skills required to accept defend and promote human rights more broadly An awareness of human rights is therefore crucial no matter what a person s age and as such it is vital that information about human rights is included within formal education Beginning with an overview of the relevant international obligations and agreements related to HRE Struthers then demonstrates that these are ostensibly not currently being met in either policy or practice in England The book then draws upon current literature and empirical research with teachers to explore and analyse the barriers to HRE implementation While the book uses the specific context of English primary education it makes broad interdisciplinary recommendations concerning how the provision of HRE could be improved which will be relevant to other countries instituting programmes of HRE or values and citizenship education Interdisciplinary in nature and addressing HRE at both the international and domestic levels this book will be of great interest to scholars researchers and postgraduate students in both education and law It will be of particular interest to those engaged in the study of human rights children s rights and education law as well as those interested in curriculum policy and development teaching methodologies and the sociology of education It should also be essential reading for teacher educators teachers and policymakers *The Electrical Review* ,1916
