Never Saw It Coming Karen A. Cerulo, 2008-09-15 People especially Americans are by and large optimists They are much better at imagining best case scenarios I could win the lottery than worst case scenarios A hurricane could destroy my neighborhood This is true not just of their approach to imagining the future but of their memories as well people are better able to describe the best moments of their lives than they are the worst Though there are psychological reasons for this phenomenon Karen A Cerulo in *Never Saw It Coming* considers instead the role of society in fostering this attitude What kinds of communities develop this pattern of thought which do not and what does that say about human ability to evaluate possible outcomes of decisions and events Cerulo takes readers to diverse realms of experience including intimate family relationships key transitions in our lives the places we work and play and the boardrooms of organizations and bureaucracies Using interviews surveys artistic and fictional accounts media reports historical data and official records she illuminates one of the most common yet least studied of human traits a blatant disregard for worst case scenarios *Never Saw It Coming* therefore will be crucial to anyone who wants to understand human attempts to picture or plan the future In *Never Saw It Coming* Karen Cerulo argues that in American society there is a positive symmetry a tendency to focus on and exaggerate the best the winner the most optimistic outcome and outlook Thus the conceptions of the worst are underdeveloped and elided Naturally as she masterfully outlines there are dramatic consequences to this characterological inability to imagine and prepare for the worst as the failure to heed memos leading up to both the 9 11 and NASA Challenger disasters for instance so painfully reminded us Robin Wagner Pacifici Swarthmore College Katrina 9 11 and the War in Iraq all demonstrate the costliness of failing to anticipate worst case scenarios *Never Saw It Coming* explains why it is so hard to do so adaptive behavior hard wired into human cognition is complemented and reinforced by cultural practices which are in turn institutionalized in the rules and structures of formal organizations But Karen Cerulo doesn't just diagnose the problem she uses case studies of settings in which people effectively anticipate and deal with potential disaster to describe structural solutions to the chronic dilemmas she describes so well *Never Saw It Coming* is a powerful contribution to the emerging fields of cognitive and moral sociology Paul DiMaggio Princeton University [Manual Training Magazine](#) Charles Alpheus Bennett, William Thomas Bawden, 1937 **Catalog of Copyright Entries.  areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have
 been made in very different branches of mathematics and its applications Since these publications are scattered over many
 journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful
 tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und
 Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them
 Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the
 material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like
 Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the
 bibliography would never have reached this final version For this reason he must be considered its responsible editor As with
 any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however
 tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were
 classified by 11839 descriptor entries **Books and Pamphlets, Including Serials and Contributions to Periodicals**
