

Además de esta tabla de precedencias la precedencia máxima, es decir la operación que antes se evalúa, es aquella que va entre paréntesis.

Veamos pues como resolvería la fórmula que hemos visto como ejemplo:

Podemos que hay 10 operaciones

- 5 SUMAS
- 3 MULTIPLICACIONES
- 1 DIVISIÓN
- 1 COMPARACIÓN

Primero resolvería por separado las operaciones de **SUMA**, después realizaría las operaciones de **MULTIPLICACIÓN**, seguidamente realizaría la **DIVISIÓN** y por último la **COMPARACIÓN**.

Insertar función con el asistente

Una función como cualquier dato se puede escribir directamente en la celda si conocemos su sintaxis, pero Excel 2003 dispone de una ayuda o asistente para utilizarlas, así nos resultará más fácil trabajar con ellas.

Si queremos introducir una función en una celda:

● Situar en la celda donde queremos introducir la función, desplegar el menú **Insertar**.

Elegir la opción **Función...**

● O bien, hacer clic sobre el botón  de la barra de fórmulas.

Aparecerá el cuadro de diálogo **Insertar función** de la derecha.

Excel 2003 nos permite buscar la función que necesitamos escribiendo una breve descripción de la función necesitada en el recuadro **Buscar una función**; y a continuación hacer clic sobre el botón , de esta forma no es necesario conocer cada una de las funciones que incorpora Excel ya que el nos mostrará en el cuadro de lista **Seleccionar una función**: las funciones que tienen que ver con la descripción escrita.
