Crumm,2010 Tom Crumm thinks the American auto industry can regain the world leadership it once enjoyed in design manufacturing and sales of world class quality vehicles and profitability There are nearly a million American jobs at stake and when the ideas in this book spread to component and other industries it becomes fuel for discussion of a turnaround of America s industrial sector and a turnaround of the economy General Motor s CEO Roger Smith was a visionary and fully realized that change was needed at GM Tom Crumm played a vital role in the rethinking that was to help the company steer a new course as a strategic planner he was deeply involved in the creation of the Saturn project in 1985 Many lessons may be learned from Saturn s rise and fall that could be used to further the understanding of how the American manufacturing sector can be restored to its world class position These include corporate culture and leadership or the lack of it the integration of technology and workers employee empowerment and labor relations supplier relations and vertical integration and sales philosophy and customer satisfaction The biggest threat to a worker s job is an unprofitable company Accordingly the adversarial relationship with the company was not in the best long term interest of union members The union had to change as well as the company This point and the whole discussion will be of compelling interest to all who want to know what happened to America s auto making capability Others have recently tried to explain what went wrong in the auto industry Crash Course by Paul Ingrassia for instance shows that the author had extraordinary access to behind the scenes meetings and conversations but he has little to say about engineering manufacturing or product development This book addresses just those practical areas where productive change can be made **Bearing Manual** ,1940 **Lemon-Aid Used Cars and Trucks 2010-2011** Phil Edmonston,2010-05-11 Lemon Aid Used Cars and Trucks 20102011 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years of production This book offers an exposé gas consumption lies a do it yourself service manual an archive of service bulletins granting free repairs and more **Popular Science** ,1966-11 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Fundamentals of Medium/Heavy Duty Commercial Vehicle Systems** Gus Wright,Owen C.
