Evolvability Thomas F. Hansen, David Houle, Mihaela Pavlicev, Christophe Pélabon, 2023-06-27 Essays on evolvability from the perspectives of quantitative and population genetics evolutionary developmental biology systems biology macroevolution and the philosophy of science *Evolvability* the capability of organisms to evolve wasn't recognized as a fundamental concept in evolutionary theory until 1990 Though there is still some debate as to whether it represents a truly new concept the essays in this volume emphasize its value in enabling new research programs and facilitating communication among the major disciplines in evolutionary biology The contributors many of whom were instrumental in the development of the concept of evolvability synthesize what we have learned about it over the past thirty years They focus on the historical and philosophical contexts that influenced the emergence of the concept and suggest ways to develop a common language and theory to drive further evolvability research The essays drawn from a workshop on evolvability hosted in 2019-2020 by the Center of Advanced Study at the Norwegian Academy of Science and Letters in Oslo provide scientific and historical background on evolvability The contributors represent different disciplines of evolutionary biology including quantitative and population genetics evolutionary developmental biology systems biology and macroevolution as well as the philosophy of science This plurality of approaches

allows researchers in disciplines as diverse as developmental biology molecular biology and systems biology to communicate with those working in mainstream evolutionary biology The contributors also discuss key questions at the forefront of research on evolvability Contributors J David Aponte W Scott Armbruster Geir H Bolstad Salom Bourg Ingo Brigandt Anne Calof James M Cheverud Josselin Clo Frietson Galis Mark Grabowski Rebecca Green Benedikt Hallgrímsson Thomas F Hansen Agnes Holstad David Houle David Jablonski Arthur Lander Arnaud LeRouzic Alan C Love Ralph Marcucio Michael B Morrissey Laura Nuño de la Rosa ystein H Opedal Mihaela Pavlićev Christophe P labon Jane M Reid Heather Richbourg Jacqueline L Sztepanacz Masahito Tsuboi Cristina Villegas Marta Vidal García Kjetil L Voje Andreas Wagner Günter P Wagner Nathan M Young

Psychobiology and Early Development H. Rauh, H.-C. Steinhausen, 1987-06-01 This volume is the outcome of an international symposium held in Berlin FRG which brought together researchers in the field of infant development The contributors are from Europe and North America and have as their primary professional interest either pediatrics biology or psychology These fields in spite of common involvement and large overlap still have to overcome communication problems and differences in scientific approaches The emphasis of this book is on the efforts of the participants towards reaching a mutual understanding In spite of disciplinary diversity the papers in this book complement each other and set the scene for future multidisciplinary research and exchange in the field of infant development

Annual Report for Fiscal Year ...
National Science Foundation (U.S.), 1979

Recapturing a Future for Space Exploration National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, Committee for the Decadal Survey on Biological and Physical Sciences in Space, 2012-01-30 More than four decades have passed since a human first set foot on the Moon Great strides have been made in our understanding of what is required to support an enduring human presence in space as evidenced by progressively more advanced orbiting human outposts culminating in the current International Space Station ISS However of the more than 500 humans who have so far ventured into space most have gone only as far as near Earth orbit and none have traveled beyond the orbit of the Moon Achieving humans further progress into the solar system had proved far more difficult than imagined in the heady days of the Apollo missions but the potential rewards remain substantial During its more than 50 year history NASA's success in human space exploration has depended on the agency's ability to effectively address a wide range of biomedical engineering physical science and related obstacles an achievement made possible by NASA's strong and productive commitments to life and physical sciences research for human space exploration and by its use of human space exploration infrastructures for scientific discovery The Committee for the Decadal Survey of Biological and Physical Sciences acknowledges the many achievements of NASA which are all the more remarkable given budgetary challenges and changing directions within the agency In the past decade however a consequence of those challenges has been a life and physical sciences research program that was dramatically reduced in

both scale and scope with the result that the agency is poorly positioned to take full advantage of the scientific opportunities offered by the now fully equipped and staffed ISS laboratory or to effectively pursue the scientific research needed to support the development of advanced human exploration capabilities. Although its review has left it deeply concerned about the current state of NASA's life and physical sciences research, the Committee for the Decadal Survey on Biological and Physical Sciences in Space is nevertheless convinced that a focused science and engineering program can achieve successes that will bring the space community, the U.S. public and policymakers to an understanding that we are ready for the next significant phase of human space exploration. The goal of this report is to lay out steps and develop a forward looking portfolio of research that will provide the basis for recapturing the excitement and value of human spaceflight thereby enabling the U.S. space program to deliver on new exploration initiatives that serve the nation, excite the public and place the United States again at the forefront of space exploration for the global good.

Continuity and Discontinuity in the Peopling of Europe Silvana Condemi, Gerd-Christian Weniger, 2011-03-23. Since the Western world first became aware of the existence of Neanderthals, this Pleistocene human has been a regular focus of interest among specialists and also among the general public. In fact, we know far more about Neanderthals than we do about any other extinct human population. Furthermore, over the past 150 years, no other palaeospecies has been such a constant source of discussion and fierce debate among palaeoanthropologists and archaeologists. This book presents the status of our knowledge as well as the methods and techniques used to study this extinct population and it suggests perspectives for future research.

The Top Books of the Year Modern Biology Understanding Populations Study Guide Answers The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Modern Biology Understanding Populations Study Guide Answers : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
