### **A Modest Proposal in the Context of Swift's Irish Tracts**

Maria-Angeles Ruiz Moneva,2020-06-12 Swift s A Modest Proposal has always aroused the interest not just of literary critics but also of linguists and pragmatists Within the latter approaches the study of irony and more concretely the intentions and attitudes that must have guided the production of such an intricate work have always been paramount However it seems that within pragmatics the analysis has been restricted so far to the 1729 work itself In the present author s view it is interesting to contextualise this masterpiece of irony and satire within Swift s wider writing on Ireland an approach that remains to be carried out Accordingly this work sets out to analyse a selection of Swift s Irish Tracts with a view to tracing the evolution within Swift s literary production of his views and attitudes towards the situation of his homeland Although different pragmatic approaches are applied the emphasis is laid upon the contributions that the relevance theoretical framework and its studies on irony may bring to the understanding of this particular Tract The works selected are meant to cover and also be

representative of the main phases currently distinguished within Swift's writing on the Irish Question. It is therefore hoped that a deeper analysis of the former works by Swift on this topic will provide new insights for a better understanding of *A Modest Proposal*.

[The Universe at Midnight](#) Ken Croswell, 2002. From the internationally acclaimed author of *Magnificent Universe*, Ken Croswell comes the definitive story of the golden age in our understanding of the universe: the age we live in right now. The universe's origin, evolution, and fate have long fascinated humanity, but until recently, these subjects resided in astronomy's never-never land. The last ten years, however, have witnessed a stunning turnabout: an avalanche of new cosmological discoveries that illuminate the greatest questions of all. *The Universe at Midnight* is a platform from which to observe these new deep-space landmarks. Mammoth new telescopes on Earth, such as the Keck Observatory in Hawaii, the Very Large Telescope in Chile, and Japan's Subaru Telescope, as well as the Hubble Space Telescope overhead, are probing the frontiers of the universe with stunning results. In 1996, astronomers pinpointed the center of the elusive Great Attractor, a mass of galaxies 250 million light years away that is trying to tug our Galaxy and thousands of others across the universe. In late 1997, two teams hunting supernovae in galaxies
