Africa from MIS 6-2 Sacha C. Jones, Brian A. Stewart, 2016-03-04 Bringing together archaeological, paleoenvironmental, paleontological, and genetic data, this book makes a first attempt to reconstruct African population histories from our species' evolution to the Holocene. Africa during Marine Isotope Stages MIS 6 to 2 (190,000 to 12,000 years ago) witnessed the biological development and behavioral florescence of our species. Modern human population dynamics, which involved multiple population expansions, dispersals, contractions, and extinctions, played a central role in our species' evolutionary trajectory. So far, the demographic processes, modern human population sizes, distributions, and movements that occurred within Africa during this critical period have been consistently under-addressed. The authors of this volume aim at: 1) examining the impact of this glacial-interglacial cycle on human group sizes, movements, and distributions throughout Africa; 2) investigating the macro and micro evolutionary processes underpinning our species' anatomical and behavioral evolution; and 3) setting an agenda whereby Africa can benefit from and eventually contribute to the increasingly sophisticated theoretical and methodological palaeodemographic frameworks developed on other continents. The Sustainability Secret Kip Andersen, Keegan Kuhn, 2016-07-12 This companion to the documentary *Cowspiracy* explores the devastating environmental impacts of animal agriculture and new paths to sustainability. One of the leading causes of deforestation, greenhouse gas production, water use, species extinction, ocean dead zones, and a host of other ills, animal agriculture is a major threat to the future of all species, and one of the environmental industry's best kept secrets. *The Sustainability Secret* expands upon *Cowspiracy* in every way. In this updated volume, the film's co-creators reveal shocking new facts and interview the leaders of businesses
