Visual Art Analysis University of Phoenix Stacey Pierce July 19, 2010 "Dream caused by the flight of a bee around a pomegranate, a second before waking up" By Salvador Dali, 1994, 51? 40. 5 cm, oil on canvas Thyssen-bornemisza collection. "A typical dream with a long theme, the consequences of a sudden accident that causes the awakening" –Salvador Dali. The Style the artist has used is Surrealism. , Salvador created this piece in such a way that the picture looks exaggerated and real. The painting shows highlights, shadows and shapes of a realistic pieces, and shows intently exaggerated color.

The Title of the piece tells the viewer that this painting is based about a dream and then its dramatic awakening, which obviously shows through the painting as there are main focal points that put line this "dream" which concludes to the title. This art work was painted using oils on canvas using a brush. The texture is smooth and the shadow and highlights are immaculate. (Otero, 2010) This art work does not have a political view, but rather gives the viewer the perception of what the painting is through the title of the painting.

Salvador uses symbols in the piece to represent the intentional focus of the dream, the symbols being the little pomegranate, the gun, the tigers, the fish and the big pomegranate. This art work shows brilliant and vibrant colours. Some colors being exaggerated to the fact that the color being used in the piece is not entirely true, for example, true colors of the tigers are done in a vibrant yellow which are false from the color of real tigers. The colors that Salvador uses give the piece depth, the colors used, gives way to the main focal points.

These focal points are brightened, drawing the viewer's attention toward the focal points and then toward the rest of the painting. Oranges, yellows, blues and grays are harmonious in nature. This creates a sense of rhythm as these colors often follow in the groups of warm and cool colors. The warm colors create the main focal point of the picture. Light is used through the elephant; the elephant is the lightest object in the painting. This could perhaps symbolize purity and goodness, showing that the elephant is the opposite of the tigers and gun.

Lights are also used through out the painting itself as the colors are light shades. In this circumstance, this could represent the "new morning" or the "awakening of the dream". Light creates the movement in this piece; it makes the picture flow evenly. The light also creates a sense of depth because of the highlights and shadows. The artist uses space well. The painting draws attention to the focal points by subtle detail in the background, such as the floating island and the rock coming out of the water.

This in its own way creates balance and space in the picture making things extremely even which compliments the color. To add to this balance the artist used natural three dimensional shapes which add a realistic feel to the painting. Line is used to create a sense of movement. Line...

**A Philosophy of Visual Metaphor in Contemporary Art** Mark

Staff Brandl, 2023-02-23 Metaphor which allows us to talk about things by comparing them to other things is one of the most ubiquitous and adaptable features of language and thought. It allows us to clarify meaning yet also evaluate and transform the ways we think, create and act. While we are alert to metaphor in spoken or written texts, it has within the visual arts been critically overlooked. Taking into consideration how metaphors are inventively embodied in the formal, technical and stylistic aspects of visual artworks, Mark Staff Brandl shows how extensively artists rely on creative metaphor within their work. Exploring the work of a broad variety of artists including Dawoud Bey, Dan Ramirez, Gaïlle Villedary, Raoul Dea, Sonya Clark, Titus Kaphar, Charles Boetschi and more, he argues that metaphors are the foundation of visual thought and are chiefly determined by bodily and environmental experiences and are embodied in artistic form. Visual artistic creation is philosophical thought. By grounding these arguments in the work of philosophers and cultural theorists including Noël Carroll, Hans Georg Gadamer and George Lakoff, Brandl shows how important metaphor is to understanding contemporary art. A Philosophy of Visual Metaphor in Contemporary Art takes a neglected feature of the visual arts and shows us what a vital role it plays within them. Bridging theory and practice and drawing upon a capacious array of examples, this book is essential reading for art historians and practitioners as well as analytic philosophers working in aesthetics and meaning. **Visual Arts**, 1993. Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as artists. You will be taught about a variety of art themes, genres, materials and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings and processes while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning by understanding better the art others create as well as making it yourself.
