

Student Exploration: Periodic Trends

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

1. On the image at right, the two magnets are the same.

Which paper clip would be harder to remove? **B**

2. Which magnet would be most likely to attract additional paper clips? **B**

3. What is the relationship between the thickness of the book and the ability of

hold on to and attract paper clips? **I believe that the thicker the book is, the harder it is for the magnet to attract more paper clips. I believe since the magnet is closer, it has a more concentrated range of strong force.**

Gizmo Warm-up

Just as the thickness of a book changes how strongly a magnet attracts a paper clip, the size of an atom determines how strongly the **nucleus** attracts electrons. In the *Periodic Trends* Gizmo, you will explore this relationship and how it affects the properties of different elements.

The **atomic radius** is a measure of the size of the **electron cloud**, or the region electrons can be found. To begin, check that **H** (hydrogen) is selected in **Group**. Turn on **Show ruler**. To measure the radius, drag one end of the ruler to the protons in the nucleus and the other end to the electron. Click **Save radius** to record the value.

1. What is the radius of hydrogen? **53 pm**

Notice that the radius is measured in **picometers** (pm). A picometer is one trillionth of a meter.

valence electron

157 pm
