**Environmental Economics SM** Charles D. Kolstad, 2011      **The British National Bibliography** Arthur James Wells, 2000      Handbook of Development Economics Dani Rodrick, M.R. Rosenzweig, 2009-11-09 What guidance does academic research really provide to economic policy development The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance Asserting that there are no universal correspondences between policies and outcomes contributors demonstrate instead that only an intense familiarity with the development context and the universe of applicable economic models can generate successful policies Getting cause and effect right is essential for policy design and implementation With the goal of drawing researchers and policy makers closer this volume highlights our increasing understanding of ways to combine economic theorizing with careful thoughtful empirical work Presents an accurate self contained survey of the current state of the field Summarizes the most recent discussions and elucidates new developments Although original material is also included the main aim is the provision of comprehensive and accessible surveys      *Central American Biodiversity* Falk Huettmann, 2015-08-04 This book highlights key results and lessons learnt from two field sites La Suerte in Costa Rica and Ometepe Nicaragua It provides long term data on species abundance and distribution Primates receive specific attention in this book as they are flagship species and good indicators for the health of an ecosystem but as well a money maker Many primate species are sensitive to habitat alteration and are often hunted out first But they play an important role as seed dispersal agents for the regeneration of the forest The book then compares results from the two field sites with regional trends and explores potential solutions such as REDD This book strongly calls for new approaches in conservation it makes the case for looking beyond the pure species biology and classic conservation angle and to take into account the economic and political realities      **The Publishers' Trade List Annual** , 1979      **Energy Abstracts for Policy Analysis** , 1983      Energy Research Abstracts , 1980      Global Warming and Energy Demand Terry Barker, Paul Ekins, Nick Johnstone, 2005-08-10 This book presents a range of current views on the use of economic measures to control greenhouse gas emissions the authors discuss the responsiveness of the energy market to changes in prices taxes and incomes The book s concern with global warming involves analyses of possible energy use both in the long and short term
