AIMS OF LESSON	The learners will be able to interpret graphs showing the population concept
INTRODUCTION	<p>Local maps and street maps Find home, school and places of interest on a map of the local area. People use maps to find their way around and to find interesting places. Most cities in South Africa have street maps. These maps are usually prepared as a book because showing a city on one sheet of paper would be too big to use.</p> <p>Using a street map to find places and describe a route Street maps help you to find places and to describe the route from one place to another. Each street has a name to help you explain which route to take. The point where the streets cross each other is called an intersection. A street map has two features to help you find things: ~ grid lines drawn on the maps to form grid squares ~ an index at the back.</p> <p>Vocabulary Grid lines: vertical and horizontal lines drawn on a map in a grid shape. Grid squares: the squares (sometimes rectangles) on a map formed by grid lines Grid reference: using numbers and letters on the grid lines to refer to a specific place on a map.</p> <p>Using an index to find places Vocabulary</p>
