## LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

### MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards into categories. What criteria did you use to select your groups?

My criteria were color and size of the lizards.

Did your criteria yield similar results? Why?

Yes, because the criteria I used, color and size, were the same for all groups. This means that the criteria I used to select my groups was the same for all groups.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation in the desert lizard.

One example of an adaptation is the ability to store water in the body. This is because the desert is a dry environment and the lizards need to store water to survive.

Provide one evolutionary explanation for why lizards living in the desert have different traits (i.e., the group) would have evolved a characteristic.

One evolutionary explanation is that lizards living in the desert have evolved a characteristic because of natural selection.
