The New Geopolitics of Natural Gas Agnia Grigas, 2017-04-24 As the United States aggressively expands its exports of liquefied natural gas it stands poised to become an energy superpower This unanticipated reality is rewriting the

conventional rules of intercontinental gas trade and realigning strategic relations among the United States the European Union Russia China and beyond as Agnia Grigas shows **Liquid Natural Gas in the United States** John

Hrastar,2014-06-24 When natural gas was first discovered in Appalachia in the 19th century its development as a fuel was rapid Unlike oil and coal gas could be moved only by pipeline and required large containers for storage It was not possible to cope with peak loads without adding excessive pipeline capacity until just before World War II when two sister gas companies developed a plant to liquefy and store natural gas as a liquid the liquid was then regasified to deal with peak loads The liquid is 1 600 the volume of the gas but it requires storage at an extremely low temperature 1 260 F This worked well until 1944 when a liquid natural gas LNG tank in Cleveland ruptured and caused a fire with 130 fatalities The fire did not end the industry but caused it to pause Over the next few years the problems in materials design standards and siting were solved The recognition that liquefaction made LNG transportable without a pipeline was the breakthrough In 1959 a shipload of LNG went from Louisiana to Britain and restarted the LNG industry It is now a major worldwide energy industry and the topic of this work *Nontechnical Guide to Energy Resources* Ben W. Failure. Russia Under Putin Harley D. Balzer, Steven A. Fisher, 2025-07-10 Examines the significant failures Russia has faced under Vladimir Putin's leadership and presents an important counterpoint to a broad range of studies emphasizing Russia's resurrection status as a persistent power or successful military reform Despite Putin's claims of restoring Russia's rightful place in the world reviving the economic and industrial capacity destroyed in the 1990s and improving living standards data show that the gains from the oil price bonanza of 2000-2008 have long since vanished The success Putin has achieved in centralizing power and repressing opposition now prevents any effective changes to address Russia's long term decline Failures include the inability to diversify the economy reduce corruption reverse demographic and educational decline alleviate poverty or address social inequalities This edited volume examines how Putin's policy choices have led to Russia's inexorable decline on the global stage Depicting Russia's inability under Vladimir Putin's rule to improve critical spheres of its national life aggravated by military belligerence and adventurism abroad chapters detail how Putin's policies have severely limited Russia's development and institutional stability leaving the country without a clear leadership transition mechanism or capacity to abandon flawed policies
