Local Tv Weekly Guide:

Social TV Mike Proulx, Stacey Shepatin, 2012-01-26 The Internet didn't kill TV. It has become its best friend. Americans are watching more television than ever before and we're engaging online at the same time we're tuning in. Social media has created a new and powerful backchannel fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And connected TVs blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing and complex television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the second screen to drive synched and deeper brand engagement. Using social ratings analytics tools to find and target lean forward audiences. Aligning brand messaging to content as it travels time shifted across devices. Determining the best strategy to approach marketing via connected TVs. Employing addressable TV advertising to maximize content relevancy. Testing and learning from the most cutting edge emerging TV innovations. The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand.

TV Guide Stephen F. Hofer, 2006 This book looks at the origins and growth of television through the pages of TV Guide and covers the complete run of this American icon from the first guides in 1953 to the last issue in guide format on October 9, 2005. It includes full color reproductions of every cover ever printed and is both a collector's guide with pricing included and a retrospective view of the medium.

The Stuff of Spectatorship Caetlin Benson-Allott, 2021-04-06 Film and television create worlds but they are also of a world, a world that is made up of stuff to which humans attach meaning. Think of the last time you watched a movie: the chair you sat in, the snacks you ate, the people around you, maybe the beer or joint you consumed to help you unwind. All this stuff shaped your experience of media and its influence on you. The material culture around film and television changes how we make sense of their content, not to mention the very concepts of the mediums. Focusing on material cultures of film and television reception, *The Stuff of Spectatorship* argues that the things we share space with and consume as we consume television and film influence the meaning we gather from them. This book examines the roles that six different material cultures have played in film and television culture since the 1970s, including video marketing, branded merchandise, drugs and alcohol, and even gun violence, and shows how objects considered peripheral to film and television culture are in fact central to its past and future.

The V-chip Debate Monroe E. Price, 2013-11-26 The V-chip is a highly significant part of the discussion about whether television or broadcasting in general deserves some special attention in terms of its accessibility to children, its particular power to affect conduct, and its invasiveness. But as this notion of filtering and labeling has caught the imagination of the regulator, the legislator, and all those who wish to consider new ways to alter bargaining over imagery in society, the very idea of the V-chip or its equivalent is moving across other technologies, including the Internet. The V-chip issue has also fueled the ongoing debate about violence and sexual practices.

in society and how representations on television relate to those practices Although the initial concept of the V chip is simple its flow into the public realm raises so many extraordinary questions that the introduction and production of the chip virtually serves as a case study in problems of law and public policy The very conceptualization of speech in society is being affected by this issue Accordingly the place of the V chip in this debate is increasingly important indeed it may be argued that the V chip s contribution to legal argumentation may be greater than its ultimate contribution to the relationship between children and imagery Among the questions the contributors address are What research basis is necessary to require a framework for labeling and rating What relationship between government and the image producing industries can be characterized for constitutional and other reasons as voluntary as opposed to coercive Who should evaluate these images To what extent should the evaluation process be centralized and or distributed What assessment is appropriate to evaluate whether the experiment is successful In addition to the V chip s origin s in Canada and its further evolution in the United States this book discusses the development of the V chip and television rating systems in Europe Australia and throughout the world It also includes essays which contrast the very different approaches in Canada and the United States in terms of the role of regulatory agency industry and government
