Logic Inquiry Argument And Order:

Logic Scott L. Pratt, 2015-01-27 An enlightening introduction to the study of logic its history philosophical foundations and formal structures Logic Inquiry Argument and Order is the first book of its kind to frame the study of introductory logic in terms of problems connected to wider issues of knowledge and judgment that arise in the context of racial cultural and religious diversity With its accessible style and integration of philosophical inquiry and real life concerns this book offers a novel approach to the theory of logic and its relevance to questions of meaning and value that arise in the world around us The book poses four problems for logic Is logic separate from experience Does logic require dualisms Can logic reconcile opposed ways of understanding the world And when things are divided does the boundary have a logic The author begins the exploration of these questions with a discussion of the process of analyzing and constructing arguments Using the logical theories of C S Peirce John Dewey and Josiah Royce to frame the investigation subsequent chapters outline the process of inquiry the concept of communicative action the nature of validity categorical reasoning through the theory of the syllogism and inductive reasoning and probability The book concludes with a presentation of modal logic propositional logic and quantification Logic is presented as emerging from the activities of inquiry and communication allowing readers to understand even the most difficult aspects of formal logic as straightforward developments of the process of anticipating and taking action Numerous practice problems use arguments related to issues of diversity and social theory and the book introduces methods of proving validity that include Venn diagrams natural deduction and the method of tableaux Logic Inquiry Argument and Order is an ideal book for courses on philosophical methods and critical reasoning at the upper undergraduate and graduate levels It is also an insightful reference for anyone who would like to explore a cross cultural approach to the topic of logic

Logical Skills Julie Brumberg-Chaumont, Claude Rosental, 2021-03-30 This

contributed volume explores the ways logical skills have been perceived over the course of history. The authors approach the topic from the lenses of philosophy, anthropology, sociology, and history to examine two opposing perceptions of logic: the first as an innate human ability and the second as a skill that can be learned and mastered. Chapters focus on the social and political dynamics of the use of logic throughout history, utilizing case studies and critical analyses. Specific topics covered include the rise of logical skills, problems concerning medieval notions of idiocy and rationality, decolonizing natural logic, natural logic and the course of time. *Logical Skills: Social Historical Perspectives* will appeal to undergraduate and graduate students as well as researchers in the fields of history, sociology, philosophy, and logic. Psychology and colonial studies scholars will also find this volume to be of particular interest.

Postfoundational Approaches to Qualitative Inquiry Lisa A. Mazzei, Alecia Y. Jackson, 2023-09-29. *Postfoundational Approaches to Qualitative Inquiry* is an edited collection that aims to move beyond a critique and deconstruction of method in order to present an engagement with various postfoundational frameworks and approaches that produce new concepts and enactments. What makes this book innovative is the singular focus on postfoundational paradigms borrowed from the humanities and sciences that are enveloped in what is referred to as the ontological turn, the new empiricisms, and the new materialisms. Postfoundational inquiry is conceived by the editors as emergent, relational, responsive, involuntary, and inventive. While the editors name the facets of these contingent approaches and explain how they work, they do so not in order to fix a new method but to spur new connectives. In this collection, authors take up a range of postfoundational theories such as poststructuralism, posthumanism, postcolonialism, feminist new materialism, speculative new empiricism, agential realism, immanent ontologies, and affect theory. Provoked by a series of reorienting questions, chapters in the book offer enactments as a way of unfurling what is unthought, not yet, and becoming. The chapters are organized according to four Openings: Atmospheres, Affects, and Hauntings; Archives, Worldings, and Sketchings; Escaping Tradition; Beginning Elsewhere; and the Politics of Doing Otherwise. Pre-personal Agencies and Thought Taking Flight. This book can be used as a standalone text in advanced qualitative inquiry courses or as a supplementary text in courses that examine the use of theory in research.

Toleration in Comparative Perspective Vicki A. Spencer, 2017-10-24. *Toleration in Comparative Perspective* is a collection of essays that explores conceptions of toleration and tolerance in Asia and the West. It tests the common assumption in Western political discourse and contemporary political theory that toleration is a uniquely Western virtue. Toleration in modern Western philosophy is understood as principled noninterference in the practices and beliefs of others that one disapproves of or at least dislikes. Although toleration might be seen today as a quintessential liberal value, precedents to this modern concept also existed in medieval times, while Indigenous American stories about welcome challenge the very possibility of noninterference. The modern Western philosophical concept of toleration is not always easily translated into other philosophical traditions, but this book opens a dialogue between various traditions of thought to explore precisely the ways in which overlap and distinctions exist. What emerges is the existence of a

family of resemblances in approaches to religious and cultural diversity from a program of pragmatic noninterference in the Ottoman Empire to deeper notions of acceptance and inclusiveness amongst the Newar People in the Kathmandu Valley The development of an Islamic ethic of tolerance the Daoist idea of all inclusiveness and Confucian ideas of broad mindedness respect and coexistence to the idea of the one in the many in Hindu thought are examined along with sources for intolerance tolerance and toleration in Pali Buddhism early modern Japan and contemporary India **The Oxford Handbook of Dewey** Steven Fesmire, 2019-08-19 John Dewey was the foremost philosophical figure and public intellectual in early to mid twentieth century America He is still the most academically cited Anglophone philosopher of the past century and is among the most cited Americans of any century In this comprehensive volume spanning thirty five chapters leading scholars help researchers access particular aspects of Dewey s thought navigate the enormous and rapidly developing literature and participate in current scholarship in light of prospects in key topical areas Beginning with a framing essay by Philip Kitcher calling for a transformation of philosophical research inspired by Dewey contributors interpret appraise and critique Dewey s philosophy under the following headings Metaphysics Epistemology Science Language and Mind Ethics Law and the Starting Point Social and Political Philosophy Race and Feminist Philosophy Philosophy of Education Aesthetics Instrumental Logic Philosophy of Technology and the Unfinished Project of Modernity Dewey in Cross Cultural Dialogue The American Philosophical Tradition the Social Sciences and Religion and Public Philosophy and Practical Ethics The Relevance of Royce Kelly A. Parker, Jason Bell, 2014-02-03 This collection represents the rediscovery of Josiah Royce s rich legacy that has occurred over the past decade The first part presents a series of historical explorations The second takes up practical extensions of Royce s work bringing his ideas and methods to bear on contemporary philosophical matters Among the topics addressed are the paradoxes of individualism loyalty democracy and community Royce s efforts to respond to historical American racism his contributions to engaged inter faith religious discourse the promise of his theory of error for a feminist account of knowledge and his ethics of loyalty as a component in medical ethics **Contemporary Feminist Pragmatism** Maurice Hamington, Celia Bardwell-Jones, 2012-08-21 The notion of feminist pragmatism or pragmatist feminism has been around since Charlene Haddock Seigfried introduced it two decades ago However the bulk of the work in this field has been directed toward recovering the feminist strain of classical American philosophy largely through renewed interest in the work of Jane Addams This exploration of the origins of feminism and pragmatism has been fruitful in building a foundation for theoretical considerations The editors of this volume believe the next logical step is the contemporary application to both theory and experience Contemporary Feminist Pragmatism is the first book to address the modern significance of the nexus of feminism and pragmatism The issues explored here include the relationship between community and identity particularly around the impact of gender and race reframing political practice regarding feminist pragmatist commitments including education sustainability movements and local efforts like community gardens and the association between ethics and inquiry

including explorations of Buddhism hospitality and animal human relationships

indispensable for anyone involved in educational ethnography and questions of methodology Pedagogical Alliances between Indigenous and Non-Dualistic Cultures Neal Dreamson, 2018-07-11 Pedagogical Alliances Between Indigenous and Non Dualistic Cultures examines Indigenous education for authentic intercultural education It critically reviews various Indigenous cultural and educational perspectives in Western education contexts addresses relevant meta cultural concerns argues for pedagogical alliances cross non dualistic cultures religions and articulates metaphysical approaches to the alliances Throughout the book the author argues that methodological enhancement of Indigenous culture can be made by proposing new values that emerge from authentic intercultural interaction which is transcendental to the binary oppositions of Indigenous and Western education To do so the author discovers pedagogical and methodological vulnerabilities of Indigenous culture in Western education systems and proposes its pedagogical alliances with non dualistic cultures such as Buddhist mindful pedagogy Confucius virtues pedagogy and Hindu contemplative pedagogy to overcome the frame of Indigenous and Western cultures for Indigenous education and to strengthen both Indigenous and non dualistic education This is the first book to address the issue of why non Indigenous cultures other than Western cultures have not been considered in Indigenous and multicultural education As such it is an invaluable text for education academics and post graduate students specialising in Indigenous education cross cultural education inclusive pedagogy and intercultural education

Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma Mohammad H. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schrödinger's Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In *Unriddling the Quantum Enigma* the first volume of the series commonly titled *Liberating Sociology From Newtonian toward Quantum Imaginations* sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the

enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyebah Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinarity through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of Disciplinary Decadence Living Thought in

Trying Times Routledge Paradigm 2006 and Freedom Justice and Decolonization Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi s Liberating Sociology succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my Creating Life Before Death challenges bureaucracy s conformist orientation so does Liberating Sociology liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University
