This bestselling reference guide contains the most reliable and comprehensive material on launch programs in Brazil China Europe India Israel and the United States Packed with illustrations and figures this edition has been updated and expanded and offers a quick and easy data retrieval source for policy makers planners engineers launch buyers and students

International Reference Guide to Space Launch Systems ,1999 **China in Space** Brian Harvey, 2013-03-27

Rockets were invented in China the home of many modern inventions including ancient astronomy and were used originally for military purposes in the 13th century The Chinese space program was founded in October 1956 by the father of Chinese rocketry Tsien Hsue Shen who lived in California in the 1930s until his expulsion as a Chinese spy In recent times there have been three manned spaceflights highlighting China s ambitious space program and generating worldwide interest Future missions are planned including a mission to go to Mars The explosive growth of China s innovative and rapidly developing space program in recent years has made it a hot topic in international space policy This follow up to Harvey s earlier book China s Space Program From Conception To Manned Spaceflight 2004 bring us up to date with everything that is happening in the Chinese space program today and looks at its ambitious future The author briefly summarizes how this program evolved from medieval times and uncovers the truth behind the bland unreliable and generally uninformative news releases issued around each space mission It also examines the key features of the program previously unknown to the outside world

China's Space Program - From Conception to Manned Spaceflight Brian Harvey, 2004-07-15 This book is designed for publication straight after the launch of China s first manned spacecraft The precursor mission Shenzhou flew unmanned in November 1999 in line with the predictions of The Chinese Space Programme From Conception to Future Capabilities 1998 the first edition of this retitled book China s Space Program From Conception to Manned Spaceflight builds on the 1998 title to take account of the first manned flight in October 2003 It also brings the reader up to date with other developments in the Chinese space programme over from 1998 to the manned flight and looks forward to China s future plans and ambitions

Outer Space in Society, Politics and Law Christian Brünner, Alexander Soucek, 2012-08-30 Spaceflight is a rational undertaking yet full of emotions It is a dream of mankind and a multi billion industry likewise It is subject to a distinct branch of law and moreover part of modern pop culture In short spaceflight is fascinating Outer Space in society politics and law is an inter disciplinary approach to the understanding of modern space law Technical cultural and historical aspects lay the foundation for a sound comprehension why space law norms have been established and what they mean in practice The reader will realize the impact space and spaceflight have on society from Stonehenge to climate change A new approach to presenting space law comprehensive and illustrative We live in a society absolutely dependent on science and technology and yet have cleverly arranged things so that almost no one understands science and technology That s a clear prescription for
